Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: 4165e701

Given that the conditions in binary star systems should make planetary formation nearly impossible, it’s not surprising that the existence of planets in such systems has lacked _____ explanation. Roman Rafikov and Kedron Silsbee shed light on the subject when they used modeling to determine a complex set of factors that could support planets’ development.

Which choice completes the text with the most logical and precise word or phrase?

- A. a discernible
- B. a straightforward
- C. an inconclusive
- D. an unbiased

ID: 4165e701 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most logically completes the text’s description of efforts to explain the existence of planets in binary star systems. As used in this context, describing an explanation as “a straightforward” one would mean that the explanation is direct and uncomplicated. The text asserts that since it should be “nearly impossible” for planets to form in binary star systems, it’s “not surprising” that there isn’t a straightforward explanation for the existence of planets in such systems; the fact that one potential approach involves “complex” factors offers further contextual support for this idea.

Choice A is incorrect because it would not make sense in context to say that there isn’t “a discernible” explanation—meaning an explanation capable of being perceived—for the existence of planets in binary star systems. The text discusses just such an explanation offered by Roman Rafikov and Kedron Silsbee, which indicates that their explanation can be discerned. Choice C is incorrect because the text emphasizes how difficult it is to explain the existence of planets in binary star systems, suggesting that the situation isn’t marked by the lack of “an inconclusive” explanation—an explanation that does not resolve the issue—but rather that if any explanations have been offered, they’ve likely been inconclusive ones. Choice D is incorrect because nothing in the text suggests that there is a lack of “an unbiased,” or impartial and unprejudiced, explanation for the existence of planets in binary star systems. The text indicates that it’s difficult to explain the existence of planets in such systems and it describes one attempt to do so, but there is no evidence that explanations from Roman Rafikov and Kedron Silsbee or others are biased.

Question Difficulty: Hard

Question ID 841a15d0

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Cross-Text Connections	

ID: 841a15d0

Text 1

Films and television shows commonly include a long list of credits naming the people involved in a production. Credit sequences may not be exciting, but they generally ensure that everyone’s contributions are duly acknowledged. Because they are highly standardized, film and television credits are also valuable to anyone researching the careers of pioneering cast and crew members who have worked in the mediums.

Text 2

Video game scholars face a major challenge in the industry’s failure to consistently credit the artists, designers, and other contributors involved in making video games. Without a reliable record of which people worked on which games, questions about the medium’s development can be difficult to answer, and the accomplishments of all but its best-known innovators can be difficult to trace.

Based on the texts, how would the author of Text 1 most likely respond to the discussion in Text 2?

- A. By recommending that the scholars mentioned in Text 2 consider employing the methods regularly used by film and television researchers
- B. By pointing out that credits have a different intended purpose in film and television than in the medium addressed by the scholars mentioned in Text 2
- C. By suggesting that the scholars mentioned in Text 2 rely more heavily on credits as a source of information than film and television researchers do
- D. By observing that a widespread practice in film and television largely prevents the kind of problem faced by the scholars mentioned in Text 2

ID: 841a15d0 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it reflects how the author of Text 1 would most likely respond to Text 2 based on the information provided. Text 2 discusses how the inconsistent use of credits to identify the contributors to video games can pose an obstacle to scholars of the medium, who rely on such credits to answer questions about the medium’s development. Text 1 notes that in film and television, on the other hand, credits are used consistently and are valuable to researchers studying the cast and crew members in these mediums. Since Text 1 asserts how the consistent use of credits benefits scholars of film and television, it can be inferred that this text’s author would respond to the discussion in Text 2 by observing that the kind of problem faced by scholars of video games—the inability to know who contributed to a particular production and how—is, in film and television studies, largely prevented by the widespread practice of credits in these mediums.

Choice A is incorrect. Although Text 1 discusses a method used by film and television researchers—namely, relying on credits to research the careers of cast and crew members—the author doesn’t explicitly recommend that or any other method. Moreover, Text 1 states that films and television shows themselves, not their researchers, regularly use the method of listing credits. Choice B is incorrect. It can be inferred from Text 2 that when video games do feature credits, they have essentially the same function as credits in film and television—namely, to identify the individuals who worked on a particular production. Therefore, it is unlikely that the author of Text 1 would characterize video game credits as differing in purpose from film and television credits. Choice C is incorrect because, as Text 2 explains, credits are not consistently used in video games. Therefore, it is unlikely that the author of Text 1 would argue that scholars of the medium discussed in this text—video games—rely more heavily on credits than scholars of film and television, two mediums where credits consistently appear.

Question Difficulty: Hard

Question ID 9c607676

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Cross-Text Connections	

ID: 9c607676

Text 1

Growth in the use of novel nanohybrids—materials created from the conjugation of multiple distinct nanomaterials, such as iron oxide and gold nanomaterials conjugated for use in magnetic imaging—has outpaced studies of nanohybrids’ environmental risks. Unfortunately, risk evaluations based on nanohybrids’ constituents are not reliable: conjugation may alter constituents’ physiochemical properties such that innocuous nanomaterials form a nanohybrid that is anything but.

Text 2

The potential for enhanced toxicity of nanohybrids relative to the toxicity of constituent nanomaterials has drawn deserved attention, but the effects of nanomaterial conjugation vary by case. For instance, it was recently shown that a nanohybrid of silicon dioxide and zinc oxide preserved the desired optical transparency of zinc oxide nanoparticles while mitigating the nanoparticles’ potential to damage DNA.

Based on the texts, how would the author of Text 2 most likely respond to the assertion in the underlined portion of Text 1?

- A. By concurring that the risk described in Text 1 should be evaluated but emphasizing that the risk is more than offset by the potential benefits of nanomaterial conjugation
- B. By arguing that the situation described in Text 1 may not be representative but conceding that the effects of nanomaterial conjugation are harder to predict than researchers had expected
- C. By denying that the circumstance described in Text 1 is likely to occur but acknowledging that many aspects of nanomaterial conjugation are still poorly understood
- D. By agreeing that the possibility described in Text 1 is a cause for concern but pointing out that nanomaterial conjugation does not inevitably produce that result

ID: 9c607676 Answer

Correct Answer: D

Rationale

Choice D is the best answer. The author of Text 2 acknowledges that nanohybrids may be more toxic than their constituent parts, but also provides an example of a nanohybrid that has reduced toxicity compared to its components: silicon dioxide and zinc oxide together have all the benefits of zinc oxide nanoparticles without any of the DNA harm zinc oxide has on its own.

Choice A is incorrect. While the author of Text 2 gives an example of a nanohybrid that isn’t as toxic as its constituent parts, they don’t argue that the benefit outweighs the risk. They merely argue that “the effects of nanomaterial conjugation vary by case.” Choice B is incorrect. The author of Text 2 states that the effects of nanomaterial conjugation “vary by case,” and that the attention that their potential toxicity has drawn is warranted. If the situation in Text 1 weren’t representative, then there would be less attention to the potential danger of these materials. Furthermore, neither passage suggests that researchers had expected that they could predict the effects of nanomaterial conjugation. Choice C is incorrect. The author of Text 2 agrees that the potential toxicity of nanohybrids “has drawn deserved attention,” so they aren’t denying the problem.

Question ID 21188a4a

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: 21188a4a

Businesses typically try to promote themselves, but research by Michael Luca, Abhishek Nagaraj, and Gauri Subramani suggests that some do not _____ their marketing. The researchers studied restaurants in Texas and found that those listed on a popular review website (which can be done at no cost) had revenue increases of 5 percent on average, but 33 percent of restaurants studied never listed on the site.

Which choice completes the text with the most logical and precise word or phrase?

- A. adorn
- B. optimize
- C. endorse
- D. counteract

ID: 21188a4a Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most logically completes the text’s discussion of business marketing practices. In this context, "optimize" means make the most effective possible use of available opportunities. The text indicates that though businesses typically try to promote themselves, they don’t always make use of effective tools for doing so, pointing to research showing that 33 percent of restaurants failed to use a free listing service that increased revenue by 5 percent on average for restaurants that did use the service. The text therefore suggests that by foregoing a free and effective marketing tool, some businesses aren’t making the best use of, or optimizing, marketing opportunities.

Choice A is incorrect because in this context, "adorn" would mean decorate or enhance the appearance of, and there’s nothing in the text to suggest that by failing to use a free and effective promotional tool, some businesses aren’t enhancing the appearance of their own marketing. The example in the text illustrates that some businesses aren’t utilizing an effective marketing opportunity, not that they aren’t improving the appearance of their marketing. Choice C is incorrect because in this context, "endorse" would mean openly approve or recommend, and the text’s discussion of the fact that some businesses have overlooked an effective marketing tool doesn’t support the idea that those businesses therefore don’t approve of their own marketing. Choice D is incorrect because in this context, saying that businesses don’t "counteract" their marketing would suggest that they don’t actively undermine it or make it ineffective. The text begins by stating that businesses typically try to promote themselves but then continues to imply that some businesses fail to take advantage of good opportunities to do so, citing the example of businesses that failed to use a free and effective marketing tool. Though it’s possible that those businesses that did use the site therefore didn’t unintentionally counteract their own marketing, the first sentence conveys that the text’s focus is on things that some businesses do and that some businesses don’t do when trying to promote themselves, and it wouldn’t make sense to say that any businesses would actively try to undermine their own marketing in pursuit of that goal.

Question Difficulty: Hard

Question ID a84b11c2

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: a84b11c2

Some scientists have suggested that mammals in the Mesozoic era were not a very _____ group, but paleontologist Zhe-Xi Luo’s research suggests that early mammals living in the shadow of dinosaurs weren’t all ground-dwelling insectivores. Fossils of various plant-eating mammals have been found in China, including species like *Vilevolodon diplomylos*, which Luo says could glide like a flying squirrel.

Which choice completes the text with the most logical and precise word or phrase?

- A. predatory
- B. obscure
- C. diverse
- D. localized

ID: a84b11c2 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most logically completes the text’s discussion of the kinds of mammals alive during the Mesozoic era. As used in this context, “diverse” means to have a significant amount of variety. The text indicates that some scientists have suggested that Mesozoic mammals can’t be characterized in a certain way, then contrasts the view put forward by those scientists with Luo’s research, which shows that Mesozoic mammals “weren’t all ground-dwelling insectivores” and instead were “various.” This context suggests that some scientists have viewed Mesozoic mammals as being all alike, or not a very diverse group.

Choice A is incorrect because it wouldn’t make sense to say that some scientists have suggested that Mesozoic mammals weren’t very “predatory,” or that they didn’t prey on other animals, since the text establishes a contrast between what some scientists have suggested and Luo’s research showing that Mesozoic mammals “weren’t all ground-dwelling insectivores.” This context suggests that some scientists have regarded Mesozoic mammals as all being insectivores, or animals that prey on insects, not that some scientists have suggested that Mesozoic mammals didn’t prey on other animals. Choice B is incorrect because it wouldn’t make sense to say that some scientists have suggested that Mesozoic mammals weren’t very “obscure,” or concealed or not well known, since the text establishes a contrast between what some scientists have suggested and Luo’s research showing that Mesozoic mammals were a varied group. There’s no contrast between saying that the mammals weren’t concealed or well known and the mammals being varied. Choice D is incorrect because it wouldn’t make sense to say that some scientists have suggested that Mesozoic mammals weren’t very “localized,” or confined to a particular area, since the text establishes a contrast between what some scientists have suggested and Luo’s research showing that Mesozoic mammals were a varied group. There’s no contrast between saying that the mammals weren’t localized and the mammals being varied. Although the text mentions mammal fossils found in China, nothing in the discussion of Luo’s research addresses the limits of Mesozoic mammal habitats.

Question ID a8c35eaf

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: a8c35eaf

Containing over 160 billion base pairs of DNA resulting from polyploidy (whole genome duplication) and accumulation of noncoding DNA without significant deletion, the genome of *Tmesipteris oblancheolata* (New Caledonian fork fern) is the largest known among eukaryotes—and, given the high biological costs of extremely large genomes, is unlikely to be _____.

Which choice completes the text with the most logical and precise word or phrase?

- A. protracted
- B. superseded
- C. curtailed
- D. obviated

ID: a8c35eaf Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most logically completes the text’s discussion of the fork fern’s enormous genome. In this context, "superseded" means surpassed or exceeded by something else. The text establishes that this plant has "the largest known" genome among eukaryotes and mentions "the high biological costs of extremely large genomes," suggesting there are natural constraints that make it biologically disadvantageous to maintain such massive genetic material. This context supports the idea that it’s unlikely another organism will evolve an even larger genome that would replace this plant’s record—that is, its status as having the largest genome is unlikely to be superseded.

Choice A is incorrect because in this context, "protracted" would mean drawn out over time or space, and the text focuses on the record size of the New Caledonian fork fern’s genome and the fact that extremely large genomes carry "high biological costs." This information suggests that the biological upper limit for genome size may have been reached and that the New Caledonian fork fern’s genome is therefore unlikely to be surpassed, or superseded, not that it’s unlikely to be protracted. Choice C is incorrect because in this context, "curtailed" would mean cut short or reduced, and the text focuses on the record size of the New Caledonian fork fern’s genome and the fact that extremely large genomes carry "high biological costs." This information suggests that the biological upper limit for genome size may have been reached and that the New Caledonian fork fern’s genome is therefore unlikely to be surpassed, or superseded, not that it’s unlikely to be curtailed. Choice D is incorrect because in this context, "obviated" would mean made unnecessary or redundant, and the text focuses on the record size of the New Caledonian fork fern’s genome and the fact that extremely large genomes carry "high biological costs." This information suggests that the biological upper limit for genome size may have been reached and that the New Caledonian fork fern’s genome is therefore unlikely to be surpassed, or superseded, not that it’s unlikely to be obviated.

Question Difficulty: Hard

Question ID f2e39001

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: f2e39001

Scholarly discussions of gender in Shakespeare’s comedies often celebrate the rebellion of the playwright’s characters against the rigid expectations _____ by Elizabethan society. Most of the comedies end in marriage, with characters returning to their socially dictated gender roles after previously defying them, but there are some notable exceptions.

Which choice completes the text with the most logical and precise word or phrase?

- A. interjected
- B. committed
- C. illustrated
- D. prescribed

ID: f2e39001 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most logically completes the text’s discussion of gender roles in Shakespeare’s comedies. As used in this context, “prescribed” would mean laid down as rules. The text indicates that the characters in the comedies often defy gender roles that are “socially dictated” (even if most characters do return to those roles eventually) and that scholars have been very interested in these acts of defiance. This context indicates that what the characters are rebelling against are standards of behavior prescribed by the society of the time.

Choice A is incorrect because saying that expectations about gender were “interjected,” or suddenly inserted between other things, wouldn’t make sense in context. There’s no suggestion in the text that the issue of gender roles was inserted between other things or was an interruption in a larger discussion. Choice B is incorrect because the text indicates that Shakespeare depicts characters rebelling against expectations about gender that have been “socially dictated,” not expectations that society has “committed,” or carried out, entrusted, or promised. Choice C is incorrect because the text indicates that Shakespeare depicts characters rebelling against expectations about gender that have been “socially dictated,” not expectations that have been “illustrated,” or clarified with examples. Although it’s possible for expectations about gender roles to be illustrated, there’s nothing in the text to indicate that characters in Shakespeare’s comedies rebel against illustrations of gender expectations.

Question Difficulty: Hard

Question ID bf0c8b48

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: bf0c8b48

The following text is adapted from George Eliot’s 1871–72 novel *Middlemarch*.

[Mr. Brooke] had travelled in his younger years, and was held in this part of the country to have contracted a too rambling habit of mind. Mr. Brooke’s conclusions were as difficult to predict as the weather.

As used in the text, what does the word “contracted” most nearly mean?

- A. Restricted
- B. Described
- C. Developed
- D. Settled

ID: bf0c8b48 Answer

Correct Answer: C

Rationale

Choice C is the best answer because as used in the text, “contracted” most nearly means developed. The text explains that Mr. Brooke has a “too rambling habit of mind,” which the text likens to a disease, saying he is thought to have contracted it. To contract a disease means to acquire or develop a disease. In other words, the text indicates that Mr. Brooke is believed to have acquired, or developed, the habit of mind described in the text.

Choice A is incorrect. Although “contracted” can mean limited or restricted in some contexts, here Mr. Brooke is said to draw unpredictable conclusions, suggesting that he exhibits this “too rambling habit of mind,” not that it has been somehow limited or restricted. Choice B is incorrect. Although the text describes Mr. Brooke’s habit of mind, nothing suggests that those are his descriptions or, indeed, that he described his habit of mind at all. Choice D is incorrect because settled means calmed or mitigated, but here Mr. Brooke is said to draw unpredictable conclusions, suggesting that he exhibits this “too rambling habit of mind,” not that it has been somehow calmed or mitigated.

Question Difficulty: Hard

Question ID da17503b

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: da17503b

Space scientists Anna-Lisa Paul, Stephen M. Elardo, and Robert Ferl planted seeds of *Arabidopsis thaliana* in samples of lunar regolith—the surface material of the Moon—and, serving as a control group, in terrestrial soil. They found that while all the seeds germinated, the roots of the regolith-grown plants were stunted compared with those in the control group. Moreover, unlike the plants in the control group, the regolith-grown plants exhibited red pigmentation, reduced leaf size, and inhibited growth rates—indicators of stress that were corroborated by postharvest molecular analysis.

Which choice best states the main purpose of the text?

- A. It describes an experiment that addressed an unresolved question about the extent to which lunar regolith resembles terrestrial soils.
- B. It compares two distinct methods of assessing indicators of stress in plants grown in a simulated lunar environment.
- C. It presents evidence in support of the hypothesis that seed germination in lunar habitats is an unattainable goal.
- D. It discusses the findings of a study that evaluated the effects of exposing a plant species to lunar soil conditions.

ID: da17503b Answer

Correct Answer: D

Rationale

Choice D is the best answer. The text describes an experiment wherein space scientists compared plant growth in terrestrial and lunar soil conditions. It then discusses the findings of the study, including the fact that all the seeds germinated but that the plants grown in lunar soil exhibited signs of stress.

Choice A is incorrect. The text doesn't address this question, and never describes any specific characteristics of either soil. It merely describes the outcome of an experiment that exposed a plant species to lunar soil conditions. Choice B is incorrect. The text never compares methods of assessing indicators of stress—instead, it simply mentions several stress indicators observed in the study (red pigmentation, reduced leaf size, and inhibited growth rates). Choice C is incorrect. The text doesn't present any evidence that we could never achieve seed germination in lunar habitats, and in fact states that the seeds in the lunar soil did germinate.

Question Difficulty: Hard

Question ID 6a9bf335

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: 6a9bf335

Studying late nineteenth- and early twentieth-century artifacts from an agricultural and domestic site in Texas, archaeologist Ayana O. Flewellen found that Black women employed as farm workers utilized hook-and-eye closures to fasten their clothes at the waist, giving themselves a silhouette similar to the one that was popular in contemporary fashion and typically achieved through more restrictive garments such as corsets. Flewellen argues that this sartorial practice shows that these women balanced hegemonic ideals of femininity with the requirements of their physically demanding occupation.

Which choice best states the main purpose of the text?

- A. To describe an unexpected discovery that altered a researcher’s view of how rapidly fashions among Black female farmworkers in late nineteenth- and early twentieth-century Texas changed during the period
- B. To discuss research that investigated the ways in which Black female farmworkers in late nineteenth- and early twentieth-century Texas used fashion practices to resist traditional gender ideals
- C. To evaluate a scholarly work that offers explanations for the impact of urban fashion ideals on Black female farmworkers in late nineteenth- and early twentieth-century Texas
- D. To summarize the findings of a study that explored factors influencing a fashion practice among Black female farmworkers in late nineteenth- and early twentieth-century Texas

ID: 6a9bf335 Answer

Correct Answer: D

Rationale

Choice D is the best answer. The text provides an overview of a scholarly work discussing the fashion practices of Black female farmworkers in late 19th- and early 20th-century Texas, and how these practices were influenced by both the fashion ideals of the time and the demands of farmwork.

Choice A is incorrect. The text never discusses the rate of fashion change among Black female farmworkers. The text also never categorizes Flewellen’s findings as "unexpected." Choice B is incorrect. The text actually explains that Black female farmworkers were trying to achieve traditional feminine ideals, not resist them. Choice C is incorrect. The text doesn’t evaluate a scholarly work but rather simply describes it. Furthermore, the text is focused on "agricultural and domestic" fashion, not urban fashion as this choice suggests.

Question Difficulty: Hard

Question ID ef9e1e81

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: ef9e1e81

The following text is from George Marion McClellan’s 1895 poem “Eternity.”

My spirit swoons, and all my senses cry
For Ocean’s breast and covering of the sky.
Rock me to sleep, ye waves, and outward bound,
Just let me drift far out from toil and care,
Where lapping of the waves shall be the sound,
Which mingled with the winds that gently bear
Me on between a peaceful sea and sky,
To make my soothing slumberous lullaby.

Which choice best states the main purpose of the text?

- A. To illustrate the increasing intensity of the speaker’s desire to escape ongoing hardship by gliding on the ocean
- B. To contrast the demands of the speaker’s everyday life with the serenity of being rocked to sleep by the ocean
- C. To convey the speaker’s longing for the ocean to impart a sense of inner tranquility
- D. To justify the speaker’s qualms about being transported by the ocean to a quiet destination

ID: ef9e1e81 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately states the main purpose of the text, which is to convey the speaker’s longing for the ocean to impart a sense of inner tranquility, or peace. The text begins by expressing the speaker’s strong desire to be on the ocean, appealing directly to the waves to rock the speaker to sleep. The poem then describes the "slumberous lullaby" formed by the sound of the waves and the winds on which the speaker wishes to be carried "gently...between a peaceful sea and sky." All these details serve to emphasize the speaker’s desire for the ocean to give them a sense of inner tranquility.

Choice A is incorrect. Given the poem’s expression of a longing to achieve tranquility by drifting on the ocean, it can be inferred that the speaker desires to escape something unpleasant in daily life. However, the poem doesn’t refer directly to any such hardship—ongoing or otherwise. And since the poem doesn’t establish that the speaker is experiencing a desire to escape ongoing hardship, it can’t be said that such a desire increases in intensity. Choice B is incorrect. The speaker does express a desire for the serenity of being rocked to sleep by the ocean, and it can be inferred that this desire is a response to demands that make the speaker’s daily life stressful. However, the poem doesn’t refer directly to such demands or contrast them with the tranquility of drifting on the ocean. Choice D is incorrect because the text doesn’t suggest the speaker has any qualms, or reservations, about being transported by the ocean. On the contrary, the speaker actively desires to "drift far out" and be carried by the waves and wind. Moreover, the poem doesn’t suggest that this drifting would have any particular destination.

Question ID ae9b39aa

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Cross-Text Connections	

ID: ae9b39aa

Text 1

When the 50-second-long film *Arrival of the Train*—which depicts what its title says, a train pulling into a station—was first shown publicly in 1896, spectators, naïve to the new medium of film and seeing a train appearing to come directly at them, leaped from their seats and fled the room. This moment marks a major cultural shift: a new way of representing and seeing the world had arrived with that train, and nothing would ever be the same.

Text 2

The fact that there is no contemporary evidence that the first audience of *Arrival of the Train* was alarmed has not stopped the story from becoming canonical, even among film historians. But that phenomenon itself is highly revealing. Our belief that the coming of film was transformative is so strong that we invented and keep retelling a founding myth that divides cultural history into a (naïve) “before” and (sophisticated) “after.”

Based on the texts, the author of Text 2 would most likely agree with which statement about the description of the first showing of *Arrival of the Train* in Text 1?

- A. It is more motivated by a perception of the significance of the invention of film than by facts.
- B. It expresses a view about the transformative nature of film that film historians tend to regard as naïve.
- C. It is not based on evidence and reflects film historians’ belief that they are more sophisticated than today’s audiences.
- D. It reflects a misconception that is widely believed because it captures early film audiences’ sense that the new medium was alarming.

ID: ae9b39aa Answer

Correct Answer: A

Rationale

Choice A is the best answer because it provides a statement about the description of the first showing of *Arrival of the Train* in Text 1 that, based on the texts, the author of Text 2 would most likely agree with. Text 1 indicates that members of the audience, unaccustomed to the new medium of film and believing that they were looking at a real oncoming train, allegedly reacted to the film with alarm. Text 1 then goes on to treat this anecdote as a factual account of the film’s first showing, interpreting it as a moment that marked a "major cultural shift." In contrast, the author of Text 2 indicates that though the story of the film’s first showing has become "canonical," or widely accepted, there is no contemporary evidence to support the idea that the audience reacted as Text 1 describes. Text 2 goes on to explain that this factually questionable description likely persists because it functions as a "founding myth" that reinforces a widespread belief in the profoundly transformative nature of the invention of film. This indicates that the author of Text 2 would likely see the description in Text 1 as motivated primarily by cultural perceptions about film’s significance rather than by documented historical facts.

Choice B is incorrect because the author of Text 2 doesn't suggest that film historians regard the view about film's transformative nature as naïve. On the contrary, Text 2 states that the story of the first showing of *Arrival of the Train* has become "canonical, even among film historians," indicating that historians broadly accept this narrative as a compelling illustration of film's impact, not that they regard either the narrative or the views it conveys about the transformative nature of film as naïve. Text 2 refers to a " (naïve) 'before'" in cultural history, but this is describing how the myth itself characterizes pre-film audiences, not how historians regard views about the transformative nature of film. Choice C is incorrect. While the author of Text 2 does indicate that the story of the audience's reaction to *Arrival of the Train* described in Text 1 is a myth that lacks evidence, the text doesn't suggest that the story reflects the fact that film historians believe themselves to be more sophisticated than modern audiences are. Rather, Text 2 suggests that the story persists because of a collective cultural belief, which historians share, in the profound impact of the invention of film. Moreover, the "naïve" versus "sophisticated" distinction mentioned in Text 2 refers to how the myth characterizes audiences before and after the invention of film; it doesn't characterize modern audiences versus film historians. Choice D is incorrect. Although the author of Text 2 would agree that the description of the first showing of *Arrival of the Train* in Text 1 reflects a misconception, the author wouldn't agree that widespread belief in the misconception can be attributed to the fact that it accurately captures early audiences' actual sense of alarm. In fact, the misconception identified by the author of Text 2 concerns the accuracy of the audience's alleged reaction; the author questions whether early audiences were alarmed at all, stating there is "no contemporary evidence" that they reacted in this way. According to Text 2, the description is widely believed not because it accurately captures historical reactions but because it serves as a "founding myth" that supports a belief in film's transformative cultural impact.

Question Difficulty: Hard

Question ID 7424ea31

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Cross-Text Connections	

ID: 7424ea31

Text 1

Fossils of the hominin *Australopithecus africanus* have been found in the Sterkfontein Caves of South Africa, but assigning an age to the fossils is challenging because of the unreliability of dating methods in this context. The geology of Sterkfontein has caused soil layers from different periods to mix, impeding stratigraphic dating, and dates cannot be reliably imputed from those of nearby animal bones since the bones may have been relocated by flooding.

Text 2

Archaeologists used new cosmogenic nuclide dating techniques to reevaluate the ages of *A. africanus* fossils found in the Sterkfontein Caves. This technique involves analyzing the cosmogenic nucleotides in the breccia—the matrix of rock fragments immediately surrounding the fossils. The researchers assert that this approach avoids the potential for misdating associated with assigning ages based on Sterkfontein’s soil layers or animal bones.

Based on the texts, how would the researchers in Text 2 most likely respond to the underlined portion in Text 1?

- A. They would emphasize the fact that the *A. africanus* fossils found in the Sterkfontein Caves may have been corrupted in some way over the years.
- B. They would contend that if analyses of surrounding layers and bones in the Sterkfontein Caves were combined, then the dating of the fossils there would be more accurate.
- C. They would argue that their techniques are better suited than other methods to the unique challenges posed by the Sterkfontein Caves.
- D. They would claim that cosmogenic nuclide dating is reliable in the context of the Sterkfontein Caves because it is applied to the fossils directly.

ID: 7424ea31 Answer

Correct Answer: C

Rationale

Choice C is the best answer. Text 2 states that the researchers used cosmogenic nuclide dating to "avoid the potential for misdating" caused by the geology of Sterkfontein, which Text 1 describes as "challenging" and unreliable.

Choice A is incorrect. Neither text suggests that the *A. africanus* fossils have been "corrupted," but only that traditional dating methods are difficult in Sterkfontein because of floods and soil mixing where the fossils were found. Nothing is implied to have compromised the fossils themselves. Choice B is incorrect. This choice misreads Text 2. Text 2 agrees that stratigraphy and other methods are prone to error in the context of Sterkfontein: there’s a "potential for misdating" when evaluating age based on soil layers and bones. Choice D is incorrect. Text 2 does not state that cosmogenic nuclide dating is applied to the fossils directly but rather to the breccia that surrounds them.

Question Difficulty: Hard

Question ID 83e4ea9a

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: 83e4ea9a

According to Indian economist and sociologist Radhakamal Mukerjee (1889–1968), the Eurocentric concepts that informed early twentieth-century social scientific methods—for example, the idea that all social relations are reducible to struggles between individuals—had little relevance for India. Making the social sciences more responsive to Indians’ needs, Mukerjee argued, required constructing analytical categories informed by India’s cultural and ecological circumstances. Mukerjee thus proposed the communalist “Indian village” as the ideal model on which to base Indian economic and social policy.

Which choice best describes the overall structure of the text?

- A. The text recounts Mukerjee’s early training in the social scientific disciplines and then lists social policies whose implementation Mukerjee oversaw.
- B. The text mentions some of Mukerjee’s economic theories and then traces their impact on other Indian social scientists of the twentieth century.
- C. The text presents Mukerjee’s critique of the social sciences and then provides an example of his attempts to address issues he identified in his critique.
- D. The text explains an influential economic theory and then demonstrates how that theory was more important to Mukerjee’s work than other social scientists have acknowledged.

ID: 83e4ea9a Answer

Correct Answer: C

Rationale

Choice C is the best answer. The text does indeed present Mukerjee’s critique of the social sciences—that they were too Eurocentric—and then provides an example of how he attempted to address the issues he identified: by suggesting a social science model based on the Indian village.

Choice A is incorrect. The text doesn’t discuss Mukerjee’s early training or his oversight of the implementation of social policies at all. Choice B is incorrect. The text never discusses any other Indian social scientists. Choice D is incorrect. The text never mentions other social scientists’ responses to Mukerjee’s work.

Question Difficulty: Hard

Question ID fda65f0a

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Cross-Text Connections	

ID: fda65f0a

Text 1

Soy sauce, made from fermented soybeans, is noted for its umami flavor. Umami—one of the five basic tastes along with sweet, bitter, salty, and sour—was formally classified when its taste receptors were discovered in the 2000s. In 2007, to define the pure umami flavor scientists Rie Ishii and Michael O’Mahony used broths made from shiitake mushrooms and kombu seaweed, and two panels of Japanese and US judges closely agreed on a description of the taste.

Text 2

A 2022 experiment by Manon Jünger et al. led to a greater understanding of soy sauce’s flavor profile. The team initially presented a mixture of compounds with low molecular weights to taste testers who found it was not as salty or bitter as real soy sauce. Further analysis of soy sauce identified proteins, including dipeptides, that enhanced umami flavor and also contributed to saltiness. The team then made a mix of 50 chemical compounds that re-created soy sauce’s flavor.

Based on the texts, if Ishii and O’Mahony (Text 1) and Jünger et al. (Text 2) were aware of the findings of both experiments, they would most likely agree with which statement?

- A. On average, the diets of people in the United States tend to have fewer foods that contain certain dipeptides than the diets of people in Japan have.
- B. Chemical compounds that activate both the umami and salty taste receptors tend to have a higher molecular weight than those that only activate umami taste receptors.
- C. Fermentation introduces proteins responsible for the increase of umami flavor in soy sauce, and those proteins also increase the perception of saltiness.
- D. The broths in the 2007 experiment most likely did not have a substantial amount of the dipeptides that played a key part in the 2022 experiment.

ID: fda65f0a Answer

Correct Answer: D

Rationale

Choice D is the best answer. Ishii and O’Mahony were trying to isolate the pure umami flavor, while Jünger was trying to recreate soy sauce, which has a mix of flavors that includes umami. Accordingly, the broths from Text 1 are not described as having any soy sauce in them—just “shiitake mushrooms and kombu seaweed.” So they probably don’t have as much of the dipeptides described in Text 2, which were found to be a key part of soy sauce’s umami-ness and its saltiness.

Choice A is incorrect. Neither text supports this. Neither text gets into the diets of people in the United States, nor the diets of people in Japan. Choice B is incorrect. Neither text supports this. Text 2 does talk about the molecular weights of chemical compounds, but there isn’t enough information provided about molecular weights in Text 1 to make an inference about what the scientists in Text 1 would say. Choice C is incorrect. Neither text supports this. Text 1 briefly mentions that soy sauce is “made

from fermented soybeans,” but it never claims that fermentation is responsible for its flavor in any way. And Text 2 never mentions fermentation at all.

Question Difficulty: Hard

Question ID b3492de4

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: b3492de4

In the 2010s, the price of pop music cassette tapes from the 1980s and 1990s rose dramatically, which had the counterintuitive effect of _____ demand: buyers who hadn't previously wanted to purchase vintage cassettes thronged the market, believing prices would continue to rise and the tapes could be resold later at a profit.

Which choice completes the text with the most logical and precise word or phrase?

- A. exploiting
- B. monetizing
- C. appraising
- D. engendering

ID: b3492de4 Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most logically completes the text’s discussion of how rising prices affected demand for vintage cassette tapes. In this context, "engendering" means producing or causing to exist. The text indicates that the effect of a dramatic increase in the price of vintage cassettes was counterintuitive, or contrary to what would typically be expected. Generally, when prices rise, demand falls—but the text indicates that in this case, buyers who previously had no interest in cassettes "thronged the market" (that is, many of them began purchasing cassettes) because they saw the cassettes as potential investments. This context conveys that the rising prices surprisingly produced significant demand, producing many new buyers for vintage cassettes.

Choice A is incorrect because the text focuses on a rise in prices of vintage cassettes, and it wouldn't make sense to describe the price increase itself—rather than sellers of vintage cassettes—as "exploiting," or unfairly or selfishly taking advantage of, demand. Further, wanting to take advantage of new demand would be a motivation for a price increase, not a counterintuitive effect of it. Choice B is incorrect. In this context, "monetizing" would mean utilizing as a source of profit, and it wouldn't make sense to describe a price increase itself, rather than sellers of vintage cassettes, as using demand as a source of profit; moreover, seeking to profit when there's new demand would be a reason for price increases, not a counterintuitive effect of them. Choice C is incorrect. In this context, "appraising" would mean assessing the value or significance of something. The text focuses on a rise in prices of vintage cassettes, and while it would be reasonable to suggest that sellers might have appraised demand for those cassettes, it wouldn't make sense to suggest that a price increase itself could do such an assessment; moreover, an appraisal of demand would most likely precede a price increase rather than be an effect of it.

Question Difficulty: Hard

Question ID 939f1fe8

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: 939f1fe8

In Jane Austen’s novel *Mansfield Park*, an almost imperceptible smile from potential suitor Henry Crawford causes the protagonist Fanny Price to blush; her embarrassment grows when she suspects that he is aware of it. This moment—in which Fanny not only infers Henry’s mental state through his gestures, but also infers that *he* is drawing inferences about *her* mental state—illustrates what literary scholar George Butte calls “deep intersubjectivity,” a technique for representing interactions between consciousnesses through which Austen’s novels derive much of their social and psychological drama.

Which choice best describes the function of the underlined sentence in the text as a whole?

- A. It states a claim about Austen’s skill at representing psychological complexity that is reinforced by an example presented in the following sentence.
- B. It advances an interpretation of an Austen protagonist who is contrasted with protagonists from other Austen novels cited in the following sentence.
- C. It describes a recurring theme in Austen’s novels that is the focus of a literary scholar’s analysis summarized in the following sentence.
- D. It provides a synopsis of an interaction in an Austen novel that illustrates a literary concept discussed in the following sentence.

ID: 939f1fe8 Answer

Correct Answer: D

Rationale

Choice D is the best answer. The underlined sentence provides a concrete example to ground readers’ understanding of the “deep intersubjectivity” described in the next sentence as central to Austen’s work.

Choice A is incorrect. There is no evaluation made of Austen’s skill in this sentence, and no examples are given in the following sentence. This choice essentially flips the paragraph: it’s this first sentence that provides an example. Choice B is incorrect. There are no other Austen protagonists mentioned in this passage, so this couldn’t be the answer. Choice C is incorrect. The underlined sentence doesn’t identify any “recurring theme,” but instead simply describes one interaction from one book. This interaction exemplifies the literary technique of “deep intersubjectivity” that is introduced in the next sentence.

Question Difficulty: Hard

Question ID bfad2097

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: bfad2097

Investigating whether shared false visual memories—specific but inaccurate and widely held recollections of images such as product logos—are caused by people’s previous _____ incorrect renditions of the images, researchers Deepasri Prasad and Wilma Bainbridge found that, in fact, such memories are often not explained by familiarity with erroneous versions of the images.

Which choice completes the text with the most logical and precise word or phrase?

- A. compliance with
- B. exposure to
- C. criteria for
- D. forfeiture of

ID: bfad2097 Answer

Correct Answer: B

Rationale

Choice B is the best answer. "Exposure to" means "having contact with." It makes sense that Prasad and Bainbridge were investigating whether seeing false versions of images was a cause of false visual memories. Notice how "exposure to incorrect renditions" matches the idea of "familiarity with erroneous versions," which appears later in the sentence.

Choice A is incorrect. "Compliance with" means "going along with a command or directive." False versions of images can’t give commands or directives, so this doesn’t apply. Choice C is incorrect. "Criteria" means "standards by which to judge something." It’s not clear how people would come to have standards for the wrong version of an image in the first place, let alone how those standards would cause them to falsely remember the correct version. In other words, this choice would result in a confusing, unclear sentence. Choice D is incorrect. "Forfeiture of" means "a giving up of something." It wouldn’t make sense to say that false memories of an image might be caused by giving up the wrong version of the image.

Question Difficulty: Hard

Question ID deb55365

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: deb55365

While most animals are incapable of passing somatic mutations—genetic alterations that arise in an organism’s nonreproductive cells—on to their offspring, elkhorn coral (*Acropora palmata*) presents an intriguing _____.: in a 2022 study, researchers found that elkhorn coral produced offspring that inherited somatic mutations from a parent.

Which choice completes the text with the most logical and precise word or phrase?

- A. hypothesis
- B. affinity
- C. anomaly
- D. corroboration

ID: deb55365 Answer

Correct Answer: C

Rationale

Choice C is the best answer. An "anomaly" is something that deviates from norms or expectations. In this case, the elkhorn coral is an anomaly because it can pass on somatic mutations, whereas most other animals can't.

Choice A is incorrect. A "hypothesis" is "a theory about something," but no theories are provided about elkhorn coral in this text, just facts. Choice B is incorrect. "Affinity" represents "an inclination or liking toward something." As genetic mutations tend to occur without any conscious effort, you can't really have an inclination toward passing on somatic mutations. Choice D is incorrect. "Corroboration" means "evidence to support or prove something." Because elkhorn coral do the opposite of what most animals do, they do not provide corroboration of the theory that somatic mutations can't be passed onto offspring. Rather, they show the opposite.

Question Difficulty: Hard

Question ID 0aa32767

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: 0aa32767

Dubautia carrii is a species in a family of plants known collectively as the silversword alliance, all of which grow only on the Hawaiian Islands. Members of this alliance exhibit an extraordinary range of phenotypes, with some species maturing into vines and others into shrubs and trees. All species in the alliance descended from a single ancestral tarweed plant that arrived on the islands around 5 million years ago. The tarweed’s descendants diversified into distinct species as they adapted to live in the wide variety of habitats found on the Hawaiian Islands.

- Which choice best states the main purpose of the text?
- A. To indicate the specific tarweed ancestor of all plants that grow on the Hawaiian Islands and explain why the plants have such varied physical characteristics
 - B. To describe the specific habitat where *Dubautia carrii* are found and identify other plants that share a common ancestor with them
 - C. To describe the silversword alliance and explain how the plant family became so varied
 - D. To advance the claim that all plants on the Hawaiian Islands are part of the silversword alliance and list possible ancestors of the plants that make up the alliance

ID: 0aa32767 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately describes the main purpose of the text, which is to describe the family of plants known as the silversword alliance and explain why the plants came to exhibit "an extraordinary range of phenotypes." The text introduces the silversword alliance as a family of plants unique to the Hawaiian Islands, presenting those that mature into vines and those that mature into shrubs and trees as examples of different phenotypes. The text concludes by explaining that these plants are all descendants of "a single ancestral tarweed plant" that arrived 5 million years ago in the Hawaiian Islands, where a "wide variety of habitats" drove the plant’s descendants to adapt and thus differentiate themselves, diversifying into a group of related but distinct species with different physical characteristics.

Choice A is incorrect. Although the text explains why the plants within the silversword alliance have varied physical characteristics, the text doesn’t suggest that tarweed is the ancestor of all plants on the Hawaiian Islands. The text states instead that all members of the silversword alliance descend from a single tarweed ancestor. Choice B is incorrect because while *Dubautia carrii* is mentioned as an example of a species in the silversword alliance, no details about its particular habitat are provided. And although the text indicates that the Hawaiian Islands are home to "a wide variety of habitats," it doesn’t describe the specific habitat where *Dubautia carrii* is found. The text discusses the silversword alliance as a whole rather than focusing on *Dubautia carrii* or any one species within this family. Choice D is incorrect. Although the silversword alliance is only found on the Hawaiian Islands and includes "an extraordinary range of phenotypes," the text doesn’t claim that all plants on the Hawaiian

Islands are part of the alliance. Furthermore, the text indicates that these plants all "descended from a single ancestral tarweed plant," not that there are multiple possible candidates for that ancestor plant.

Question Difficulty: Hard

Question ID 76d87f54

ID: 76d87f54

Economist Marco Castillo and colleagues showed that nuisance costs—the time and effort people must spend to make donations—reduce charitable giving. Charities can mitigate this effect by compensating donors for nuisance costs, but those costs, though variable, are largely _____ donation size, so charities that compensate donors will likely favor attracting a few large donors over many small donors.

Which choice completes the text with the most logical and precise word or phrase?

- A. supplemental to
- B. predictive of
- C. independent of
- D. subsumed in

ID: 76d87f54 Answer

Correct Answer: C

Rationale

Choice C is the best answer. We’re told that charities that pay donors back for nuisance costs will attract a few large donors instead of many small donors. This suggests that nuisance costs are not linked to donation size.

Choice A is incorrect. This doesn’t fit the logic of the text. If nuisance costs are supplemental to (meaning in addition to) donation size, that wouldn’t result in charities that compensate donors for those costs attracting a few large donors over many small donors. Choice B is incorrect. This doesn’t fit the logic of the text. If nuisance costs can predict donation size, that wouldn’t necessarily result in charities that compensate donors for those costs attracting a few large donors over many small donors. Choice D is incorrect. This doesn’t fit the logic of the text. If nuisance costs are subsumed in (meaning included in) donation size, that wouldn’t result in charities that compensate donors for those costs attracting a few large donors over many small donors.

Question Difficulty: Hard

Question ID c6da512f

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: c6da512f

While scholars believe many Mesoamerican cities influenced each other, direct evidence of such influence is difficult to ascertain. However, recent excavations in a sector of Tikal (Guatemala) unearthed a citadel that shows _____ Teotihuacán (Mexico) architecture—including a near replica of a famed Teotihuacán temple—providing tangible evidence of outside influence in portions of Tikal.

Which choice completes the text with the most logical and precise word or phrase?

- A. refinements of
- B. precursors of
- C. commonalities with
- D. animosities toward

ID: c6da512f Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most logically completes the text’s discussion of architectural influences among Mesoamerican cities. In this context, “commonalities with” means similarities to or shared attributes with. The text indicates that a recently discovered citadel in Tikal includes a close imitation of a famous temple in Teotihuacán (another Mesoamerican city) and other evidence of Teotihuacán influence, which suggests that the citadel possesses features that resemble architectural features found in Teotihuacán. This context thus indicates that the Tikal citadel shows commonalities with Teotihuacán architecture.

Choice A is incorrect because there’s nothing in the text that suggests that the Tikal citadel shows “refinements of,” or improvements on, Teotihuacán architecture. Although the text suggests that the architecture of Teotihuacán influenced the architecture of the Tikal citadel, and although it’s possible that later architectural designs could make improvements on earlier designs, the text doesn’t discuss whether, in imitating Teotihuacán architecture, the Tikal citadel’s builders improved on it. Choice B is incorrect because describing the citadel in Tikal as showing “precursors of” Teotihuacán architecture—or features that preceded and foreshadowed those of Teotihuacán architecture—would imply the opposite of what the text suggests about the relationship between the architecture found in Tikal and Teotihuacán. The text claims that the discovery of similarities between the Tikal citadel and the architecture of Teotihuacán, including a replica of a temple in Teotihuacán, provides evidence of outside influences on Tikal architecture. If the Tikal citadel was influenced by Teotihuacán architecture, then the Teotihuacán architecture must predate the citadel, not the other way around. In this context, therefore, it wouldn’t make sense to say that the Tikal citadel shows precursors of Teotihuacán architecture. Choice D is incorrect because the text discusses how the citadel in Tikal indicates the influence of Teotihuacán architecture, which implies that the makers of the Tikal citadel likely admired aspects of Teotihuacán architecture enough to imitate it. Thus, there’s no reason to think that the Tikal citadel provides evidence of the Tikal people’s “animosities toward,” or feelings of strong dislike or hostility toward, Teotihuacán architecture.

Question ID 755cb5eb

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: 755cb5eb

During Rome’s republican period, which ended in the first century BCE, libraries were predominantly owned by wealthy individuals who tightly controlled access to their book collections. The first public library became available in Rome in 28 BCE and was soon followed by one commissioned by Emperor Augustus. As modern scholar Fabio Fernandes notes, however, these two traditions aren’t as distinct as they seem, as both the emperor and the private library owners viewed their libraries as extensions of their personal patronage, just on vastly differing scales.

Which choice best states the main purpose of the text?

- A. To give a brief overview of public access to libraries throughout Rome’s republican period
- B. To contend that early imperial leaders in Rome wielded too much influence over libraries
- C. To assert that private and early public libraries in ancient Rome had an essential similarity
- D. To call into question the notion that private Roman libraries disappeared during the first century BCE

ID: 755cb5eb Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most accurately describes the main purpose of the text. The text describes two types of libraries in first-century BCE Rome—private libraries controlled by wealthy individuals, and the public libraries like that commissioned by Emperor Augustus—and then notes that "these two traditions aren’t as distinct as they seem." It explains that both private-library owners and the emperor saw their libraries as "extensions of their personal patronage, just on vastly differing scales," because the emperor’s patronage extended to the whole citizenry of Rome. Thus, both private and public libraries in ancient Rome were fundamentally tied to relevant principles of patronage.

Choice A is incorrect because the text mentions that Rome’s republican period only to say that it "ended in the first century BCE," thus it doesn’t support any conclusions about possible occurrences "throughout Rome’s republican period." Choice B is incorrect. The text neither discusses "early imperial leaders in Rome," nor whether their level of influence was appropriate. Rather it discusses the end of "Rome’s republican period" in relation to libraries, who created them, and who got to use them without passing judgment on propriety. Choice D is incorrect. Although the text indicates that Rome’s republican period "ended in the first century BCE," a period that also saw the first public library come into use (28 BCE), nothing in the text suggests that private libraries disappeared at that time.

Question Difficulty: Hard

Question ID 368d7615

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: 368d7615

Text corpora such as the Bank of English are enormous collections of electronically stored texts that can be used for empirical testing of hypotheses regarding the frequency of typical word usage. If one has a _____ that the word “get” has a high incidence in English, for example, an analysis of a corpus can support that hypothesis by showing that “get” is the fifth most commonly used verb.

Which choice completes the text with the most logical and precise word or phrase?

- A. recognition
- B. scheme
- C. supposition
- D. synopsis

ID: 368d7615 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most logically completes the text’s discussion of testing hypotheses regarding usage by means of text corpora. In this context, "supposition" refers to an assumption or hypothesis that is not yet proven. The text explains that text corpora can be used for "empirical testing of hypotheses regarding the frequency of typical word usage" and then provides a specific example of using corpus analysis to support a claim about the word "get." The word "supposition" precisely conveys this idea of an assumption or hypothesis about word frequency that can then be tested against empirical data.

Choice A is incorrect because it wouldn’t make sense to say that someone has a "recognition" that the word "get" has a high incidence in English. Recognition implies acknowledging something already established as true or valid, but the text indicates that corpus analysis is needed to support the claim about "get," suggesting its high frequency wasn’t already established or previously known. Choice B is incorrect because it wouldn’t make sense to say that someone has a "scheme" that the word "get" has a high incidence in English. A scheme is a plan or systematic arrangement, but the context indicates what’s needed is a preliminary hypothesis that can be tested with corpus data, not a plan related to word frequency. Choice D is incorrect because it wouldn’t make sense to say that someone has a "synopsis" that the word "get" has a high incidence in English. A synopsis is a summary or outline, but the text is discussing an initial hypothesis about word frequency that requires testing, not a condensed statement of existing information.

Question Difficulty: Hard

Question ID 2e5a7736

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: 2e5a7736

As an undergraduate researcher in anthropology, Jennifer C. Chen contributed to a groundbreaking study challenging the accepted view that among prehistoric peoples, female participation in hunting was _____. The research team’s review of data from late Pleistocene and early Holocene burials in the Americas revealed that, in fact, as many as half of the hunters in those populations were female.

Which choice completes the text with the most logical and precise word or phrase?

- A. inevitable
- B. satisfactory
- C. negligible
- D. commonplace

ID: 2e5a7736 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most logically completes the text’s discussion of the study of female participation in hunting among prehistoric peoples. In this context, “negligible” means not significant enough to be worth considering. The text says that the study challenged the accepted view of female participation in hunting among prehistoric peoples. The text goes on to say that the researchers found that “in fact, as many as half” the hunters in the groups studied were female. The phrase “in fact” establishes a contrast indicating that the finding that as many as half the hunters were female differs from the accepted view. This context suggests, then, that the accepted view is that female participation in hunting was negligible.

Choice A is incorrect because the text indicates that the study challenged the accepted view by showing that as many as half of hunters among prehistoric peoples were female, which suggests that the accepted view is that female participation was low, not that female participation was “inevitable,” or unavoidable. Nothing in the text suggests that the accepted view is that prehistoric peoples could not avoid female participation in hunting. Choice B is incorrect because nothing in the text suggests that the accepted view of female participation in hunting among prehistoric peoples is that such participation was “satisfactory,” or sufficient to meet a requirement or demand. There is no information in the text about any demands or requirements regarding female participation in hunting, let alone any information about how much female participation in hunting would be enough to satisfy those demands or requirements. Instead, the text indicates that the study challenged the accepted view by showing that as many as half the hunters in the groups studied were female, suggesting that the accepted view is that female participation in hunting was low. Choice D is incorrect because the text indicates that the study challenged the accepted view by showing that as many as half of hunters among the prehistoric peoples studied were female, which suggests that the accepted view is that female participation was low, not that female participation was “commonplace,” or ordinary or unremarkable. Although the study under discussion suggests that female participation may have been commonplace, that study is presented as challenging the accepted view, not as reinforcing the accepted view.

Question ID 8dd4b0d5

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Cross-Text Connections	

ID: 8dd4b0d5

Text 1

Virginia Woolf’s 1928 novel *Orlando* is an oddity within her body of work. Her other major novels consist mainly of scenes of everyday life and describe their characters’ interior states in great detail, whereas *Orlando* propels itself through a series of fantastical events and considers its characters’ psychology more superficially. Woolf herself sometimes regarded the novel as a minor work, even admitting once that she “began it as a joke.”

Text 2

Like Woolf’s other great novels, *Orlando* portrays how people’s memories inform their experience of the present. Like those works, it examines how people navigate social interactions shaped by gender and social class. Though it is lighter in tone—more entertaining, even—this literary “joke” nonetheless engages seriously with the themes that motivated the four or five other novels by Woolf that have achieved the status of literary classics.

- Based on the texts, how would the author of Text 2 most likely respond to the assessment of *Orlando* presented in Text 1?
- A. By conceding that Woolf’s talents were best suited to serious novels but asserting that the humor in *Orlando* is often effective
 - B. By agreeing that *Orlando* is less impressive than certain other novels by Woolf but arguing that it should still be regarded as a classic
 - C. By acknowledging that *Orlando* clearly differs from Woolf’s other major novels but insisting on its centrality to her body of work nonetheless
 - D. By concurring that the reputation of *Orlando* as a minor work has led readers to overlook this novel but maintaining that the reputation is unearned

ID: 8dd4b0d5 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it reflects how the author of Text 2 would most likely respond to the assessment of *Orlando* in Text 1. Both authors agree that *Orlando* is unusual for Woolf: Text 1 states that the novel examines its characters’ psychologies more superficially than Woolf’s other novels do, and Text 2 describes it as being lighter in tone. However, while Text 1 calls *Orlando* an “oddity” and mentions that Woolf “began it as a joke,” Text 2 asserts that *Orlando* engages the same themes as Woolf’s other great novels. Hence, the author of Text 2 would most likely accept that *Orlando* differs from Woolf’s other novels but would also insist on its importance in the context of Woolf’s work as a writer.

Choice A is incorrect. Text 2 does suggest that the humor in *Orlando* is effective. However, there’s nothing in Text 2 to suggest that the author would agree that Woolf’s talents were best suited to serious novels. Rather, the author of Text 2 compares *Orlando* favorably to other novels by Woolf that are implied to be darker in tone. Choice B is incorrect because the author of Text 2 does not indicate that *Orlando* is less impressive than Woolf’s other novels, but instead points out that it engages the same themes as

other novels by Woolf that are considered classics. Choice D is incorrect because there's nothing in Text 1 or Text 2 to suggest that readers have generally ignored *Orlando* because of its reputation.

Question Difficulty: Hard

Question ID e5f76480

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Cross-Text Connections	

ID: e5f76480

Text 1

Like the work of Ralph Ellison before her, Toni Morrison’s novels feature scenes in which characters deliver sermons of such length and verbal dexterity that for a time, the text exchanges the formal parameters of fiction for those of oral literature. Given the many other echoes of Ellison in Morrison’s novels, both in structure and prose style, these scenes suggest Ellison’s direct influence on Morrison.

Text 2

In their destabilizing effect on literary form, the sermons in Morrison’s works recall those in Ellison’s. Yet literature by Black Americans abounds in moments where interpolated speech erodes the division between oral and written forms that literature in English has traditionally observed. Morrison’s use of the sermon is attributable not only to the influence of Ellison but also to a community-wide strategy of resistance to externally imposed literary conventions.

- Based on the texts, how would the author of Text 2 most likely characterize the underlined claim in Text 1?
- A. As failing to consider Ellison’s and Morrison’s equivalent uses of the sermon within the wider cultural context in which they wrote
 - B. As misunderstanding the function of sermons in novels by Black American writers other than Ellison and Morrison
 - C. As disregarding points of structural and stylistic divergence between the works of Ellison and those of Morrison
 - D. As being indebted to the tradition of resisting literary conventions that privilege written forms, such as novels, over sermons and other oral forms

ID: e5f76480 Answer

Correct Answer: A

Rationale

Choice A is the best answer. The author of Text 2 argues that Morrison’s use of the sermon is not only influenced by Ellison, but also by a “community-wide strategy of resistance” to literary conventions practiced by Black American authors. Ellison, Text 2 alleges, is only one of many influences on Morrison.

Choice B is incorrect. Neither text specifically mentions sermons in works by authors other than Morrison or Ellison, only a tendency towards eroding “the division between oral and written forms” among Black American writers. Choice C is incorrect. Both texts describe similarities between the works of Ellison and Morrison, and neither points out instances of divergence. Text 2 simply suggests that Morrison was influenced by more than just Ellison. Choice D is incorrect. While Text 2 does discuss Morrison’s resistance to certain literary conventions, it’s unclear what it would mean for the underlined claim to be “indebted” to that tradition. This choice recycles language from the text, but not in a way that makes any coherent point.

Question Difficulty: Hard

Question ID 67a1f442

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: 67a1f442

Despite how _____ they may seem on first glance, the works of the philosopher Georg Hegel have proven to be quite influential. Readers who manage to penetrate Hegel’s frustratingly dense prose often find that his thrillingly original and profound ideas wind up shaping their own thinking.

Which choice completes the text with the most logical and precise word or phrase?

- A. authoritative
- B. opaque
- C. empirical
- D. facile

ID: 67a1f442 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most logically completes the text’s discussion of Hegel’s works. In this context, "opaque" means difficult to understand or unclear. The text creates a contrast between the initial impression given by Hegel’s works and their influence and insight, noting that readers must "penetrate Hegel’s frustratingly dense prose" to access his important ideas. This context clearly establishes that Hegel’s writing is initially challenging to comprehend, or opaque.

Choice A is incorrect because "authoritative" means influential or clearly accurate. Hegel’s works may be authoritative, but it wouldn’t make logical sense in context to say that although his works seem authoritative, they have been influential. Instead, the text focuses on the fact that Hegel’s works are challenging to read, but that working through the dense prose can be rewarding. Choice C is incorrect because referring to Hegel’s works as "empirical," which means factual or verifiable, would suggest that they are based on observation or experience rather than theory. The text, however, doesn’t address this aspect of Hegel’s philosophy. Instead, it focuses on the difficulty of understanding his writing. Choice D is incorrect because describing Hegel’s works as "facile," which means superficial or simplistic, would directly contradict the text’s characterization of his writing as "frustratingly dense" and requiring effort to understand.

Question Difficulty: Hard

Question ID 472bbfdf

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: 472bbfdf

Vadamalai Elangovan and Ganapathi Marimuthu showed that high moonlight intensity inhibits the activity of the greater short-nosed fruit bat (*Cynopterus sphinx*), a result explicable in terms of benefits and costs: greater lunar intensity may not enable the bats to increase foraging success enough to offset the higher chance of detection by predatory owls or hawks. Most other nocturnal mammals respond to lunar intensity variations similarly to greater short-nosed fruit bats, but mongoose lemurs (*Eulemur mongoz*) display the opposite pattern, as their heavy reliance on visual foraging results in a different balance of reward and risk.

Which choice best describes the overall structure of the text?

- A. It discusses two different responses to the same natural phenomenon, explains why one of those responses occurs, and then suggests that the other response still needs to be explained.
- B. It describes and accounts for a finding, characterizes the finding as representative of a general pattern, and then describes and accounts for an exception to that pattern.
- C. It presents and explains a study result, indicates that the result is similar to the results of many other studies, and then attributes a conflicting study result to a difference in that study’s methods.
- D. It introduces an observation of a behavioral pattern, presents an explanation for the pattern, and then describes an exception to the pattern that casts doubt on that explanation.

ID: 472bbfdf Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately describes the overall structure of the text. The text begins by describing a study’s finding about greater short-nosed fruit bats—namely, that high moonlight intensity inhibits the bats’ activity—and also accounts for that finding, stating that this occurs because the potential increase in foraging success that greater lunar intensity enables doesn’t offset these bats’ increased vulnerability to predators (whose vision is also implied to become more acute under intense moonlight). The text goes on to characterize this finding as representative of a general pattern, stating that many nocturnal mammals behave similarly in response to changes in lunar intensity. The text concludes by describing an exception to this pattern, explaining that mongoose lemurs display an opposite tendency because they rely heavily on visual foraging. This strategy presumably would allow them to derive more benefit from greater lunar intensity than many other nocturnal mammals would, resulting in a "different balance of reward and risk" than exists for other nocturnal mammals. Therefore, the overall structure of the text is best described as a description and account of a finding, a characterization of that finding as representative of a pattern, and then a description and account of an exception to that pattern.

Choice A is incorrect. Although the text discusses two different responses to variations in moonlight intensity, explaining that as moonlight intensity increases, greater short-nosed fruit bats and many other nocturnal mammals decrease their foraging activity but mongoose lemurs increase their foraging activity, it doesn’t leave one of these responses unexplained. The text accounts for

both the typical response to increased lunar intensity (reduced activity due to predation risk) and the exception (increased activity due to a reliance on visual foraging) by making reference to a cost-benefit framework. Choice C is incorrect. Although the text presents a study's finding about the effect of increased lunar intensity on greater short-nosed fruit bats' activity before going on to contrast this behavior with the fact that mongoose lemurs display the opposite response to increased lunar intensity, the text doesn't explicitly invoke other studies and doesn't attribute this difference in observed behavior to the fact that the study of greater short-nosed fruit bats used different methods than studies of mongoose lemurs did. Rather, the text explains that the different observed behaviors can be attributed to differences in species' foraging strategies. Choice D is incorrect. Although the text characterizes the behavior of mongoose lemurs in response to increased lunar intensity as an exception to a pattern of behavior observed in other nocturnal mammal species, this exception doesn't cast any doubt on the explanation that is offered for the general pattern observed among other species. Instead, the text uses the same cost-benefit framework to explain why increased lunar intensity is associated with decreased activity by greater short-nosed fruit bats and other nocturnal mammals but with increased activity by mongoose lemurs.

SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: a05fe244

The 1967 release of Harold Cruse’s book *The Crisis of the Negro Intellectual* isolated him from almost all other scholars and activists of the American Civil Rights Movement—though many of those thinkers disagreed with each other, he nonetheless found ways to disagree with them all. He thought that activists who believed that Black people such as himself should culturally assimilate were naïve. But he also sharply criticized Black nationalists such as Marcus Garvey who wanted to establish independent, self-contained Black economies and societies, even though Cruse himself identified as a Black nationalist.

- Which choice best describes the function of the underlined sentence in the text as a whole?
- A. It describes a direction that Cruse felt the Civil Rights Movement ought to take.
 - B. It indicates that Cruse’s reputation as a persistent antagonist of other scholars is undeserved.
 - C. It describes a controversy that Cruse’s work caused within the Black nationalist movement.
 - D. It helps explain Cruse’s position with respect to the community of civil rights thinkers.

ID: a05fe244 Answer

Correct Answer: D

Rationale

Choice D is the best answer. The text as a whole claims that Cruse disagreed with virtually all other Civil Rights scholars and activists. The underlined sentence describes one way that Cruse both did and didn’t fit in with those thinkers: he criticized Black nationalists, even though he identified as one.

Choice A is incorrect. The underlined sentence doesn’t do this. It describes Cruse’s criticisms—it never mentions what Cruse did want the movement to do instead. Choice B is incorrect. This conflicts with the text, which argues that Cruse did disagree with almost all other scholars of the Civil Rights Movement. Choice C is incorrect. This is a step too far. The text never says that Cruse’s work caused controversy within the Black nationalist movement.

Question Difficulty: Hard

Question ID 0a9b75f3

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: 0a9b75f3

The following text is adapted from Herman Melville’s 1857 novel *The Confidence-Man*. Humphry Davy was a prominent British chemist and inventor.

Years ago, a grave American savant, being in London, observed at an evening party there, a certain coxcombical fellow, as he thought, an absurd ribbon in his lapel, and full of smart [banter], whisking about to the admiration of as many as were disposed to admire. Great was the savant’s disdain; but, chancing ere long to find himself in a corner with the jackanapes, got into conversation with him, when he was somewhat ill-prepared for the good sense of the jackanapes, but was altogether thrown aback, upon subsequently being [informed that he was] no less a personage than Sir Humphry Davy.

Which choice best states the main purpose of the text?

- A. It portrays the thoughts of a character who is embarrassed about his own behavior.
- B. It presents an account of a misunderstanding.
- C. It offers a short history of how a person came to be famous.
- D. It explains why one character dislikes another.

ID: 0a9b75f3 Answer

Correct Answer: B

Rationale

Choice B is the best answer. The text tells a story of a first impression that turned out to be wrong: a serious American savant was dismissive of a goofy-looking, wisecracking guest at a British party, and then was shocked to learn that the guest was actually a prominent British chemist and inventor.

Choice A is incorrect. This is too strong and too narrow. Only at the very end is the savant "thrown aback" by the fact that the man was Sir Humphry Davy—he’s not "embarrassed about his own behavior." Choice C is incorrect. This isn’t the main purpose. The text never provides the history of how Sir Humphry Davy came to be famous. Nor does it provide any history for the American savant. Choice D is incorrect. This is too narrow. It doesn’t include the second half of the text, where the savant gets into a conversation with the man and then finds out that the man is Sir Humphry Davy.

Question Difficulty: Hard

Question ID 372b3cc3

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: 372b3cc3

Despite stated claims of global relevance, much major research on income inequality performed in the 2010s suffered from a myopic focus on a few countries in North America and Western Europe, partly due to limited data availability. Researchers would later _____ this shortcoming after gaining new access to banking records located in nations in Africa, such as Tunisia, and Eastern Europe, such as Hungary.

Which choice completes the text with the most logical and precise word or phrase?

- A. presuppose
- B. categorize
- C. mitigate
- D. validate

ID: 372b3cc3 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most logically completes the text’s discussion of research on income inequality in the 2010s. In this context, "mitigate" means to make less severe or reduce the negative effects of something. The text first identifies a shortcoming in the research: a "myopic focus on a few countries" despite claims of "global relevance." The text then explains that researchers later gained access to new data from previously excluded regions (Africa and Eastern Europe). This context supports the idea that with these new data, researchers would be able to reduce, or mitigate, the identified shortcoming by incorporating a broader range of geographic regions into their studies of income inequality.

Choice A is incorrect because in this context, "presuppose" would mean to assume in advance that something is true, and it wouldn't make logical sense to say that researchers later assumed as true in advance a shortcoming they had already encountered. Choice B is incorrect because in this context, "categorize" would mean to classify or place into groups. The text indicates that researchers did something about the shortcoming that characterized research on income inequality in the 2010s—limited geographic scope—after they gained access to new data from previously excluded regions. Categorizing a shortcoming doesn't require access to or analysis of new data; it could be done without any new information, but by analyzing new data, researchers went beyond merely categorizing the shortcoming and instead took action to address it. Choice D is incorrect because in this context, "validate" would mean to confirm or substantiate something. The text indicates that researchers did something about a known shortcoming of research on income inequality in the 2010s—limited geographic scope—after they gained access to new data from previously excluded regions. Confirming an already known shortcoming doesn't require access to or analysis of new data; it could be done without any new information, but by analyzing new data, researchers went beyond merely validating the shortcoming and instead took action to make the shortcoming less severe.

Question Difficulty: Hard

Question ID 4183cbda

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Cross-Text Connections	

ID: 4183cbda

Text 1

In 2007, a team led by Alice Storey analyzed a chicken bone found in El Arenal, Chile, dating it to 1321–1407 CE—over a century before Europeans invaded the region, bringing their own chickens. Storey also found that the El Arenal chicken shared a unique genetic mutation with the ancient chicken breeds of the Polynesian Islands in the Pacific. Thus, Polynesian peoples, not later Europeans, probably first introduced chickens to South America.

Text 2

An Australian research team weakened the case for a Polynesian origin for the El Arenal chicken by confirming that the mutation identified by Storey has occurred in breeds from around the world. More recently, though, a team led by Augusto Luzuriaga-Neira found that South American chicken breeds and Polynesian breeds share other genetic markers that European breeds lack. Thus, the preponderance of evidence now favors a Polynesian origin.

Based on the texts, how would the author of Text 2 most likely respond to the underlined claim in Text 1?

- A. By broadly agreeing with the claim but objecting that the timeline it presupposes conflicts with the findings of the genetic analysis conducted by Storey’s team
- B. By faulting the claim for implying that domestic animals couldn’t have been transferred from South America to the Polynesian Islands as well
- C. By critiquing the claim for being based on an assumption that before the European invasion of South America, the chickens of Europe were genetically uniform
- D. By noting that while the claim is persuasive, the findings of Luzuriaga-Neira’s team provide stronger evidence for it than the findings of the genetic analysis conducted by Storey do

ID: 4183cbda Answer

Correct Answer: D

Rationale

Choice D is the best answer because it accurately describes how the author of Text 2 would most likely respond to the underlined claim in Text 1. Text 1 indicates that Storey found a genetic mutation in South American chickens from before the European invasion and in Polynesian chickens, which implies that chickens were first brought to South America by Polynesian people. Text 2 explains that the genetic mutation Storey found is in chickens from all over the world, thus undercutting the mutation as evidence of a Polynesian origin. However, Text 2 goes on to say “[m]ore recently” Luzuriaga-Neira and colleagues found multiple genetic markers shared by South American and Polynesian chickens but “that European breeds lack,” which strongly suggests a Polynesian origin for the South American chickens. This indicates that the author of Text 2 believes Luzuriaga-Neira’s evidence for a Polynesian origin is compelling while Storey’s evidence has been undermined. Thus, the author of Text 2 would most likely agree

with the underlined statement and believes Luzuriaga-Neira and colleagues' evidence for the statement is stronger than Storey's evidence is.

Choice A is incorrect because both texts indicate that chickens were introduced to South America before the arrival of Europeans. Text 1 states that the El Arenal chicken bone dates from "1321–1407 CE—over a century before Europeans invaded the region" and concludes that these chickens were likely brought to South America by Polynesians. While Text 2 is not as explicit about the time period as Text 1 is, nothing in Text 2 undermines the timing of events ascribed to Storey's account in Text 1. Choice B is incorrect because both texts agree that chickens were first brought to South America by Polynesian peoples (the underlined claim), and nothing in Text 2 suggests that this claim is in any way deficient because the possibility that animals could have been transferred from South America to Polynesia was not explicitly addressed. Choice C is incorrect because the criticism that Text 2 raises about the ideas in Text 1 is specifically about whether the single genetic mutation cited by Storey in fact supports the idea of a Polynesian origin for South American chickens. There is nothing in Text 2 to suggest that the underlined sentence (Storey's conclusion) is deficient because it is based on an assumption about the genetic uniformity of European chickens.

Question Difficulty: Hard

Question ID 06346bcd

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: 06346bcd

Some studies have suggested that posture can influence cognition, but we should not overstate this phenomenon. A case in point: In a 2014 study, Megan O'Brien and Alaa Ahmed had subjects stand or sit while making risky simulated economic decisions. Standing is more physically unstable and cognitively demanding than sitting; accordingly, O'Brien and Ahmed hypothesized that standing subjects would display more risk aversion during the decision-making tasks than sitting subjects did, since they would want to avoid further feelings of discomfort and complicated risk evaluations. But O'Brien and Ahmed actually found no difference in the groups' performance.

Which choice best states the main purpose of the text?

- A. It argues that research findings about the effects of posture on cognition are often misunderstood, as in the case of O'Brien and Ahmed's study.
- B. It presents the study by O'Brien and Ahmed to critique the methods and results reported in previous studies of the effects of posture on cognition.
- C. It explains a significant problem in the emerging understanding of posture's effects on cognition and how O'Brien and Ahmed tried to solve that problem.
- D. It discusses the study by O'Brien and Ahmed to illustrate why caution is needed when making claims about the effects of posture on cognition.

ID: 06346bcd Answer

Correct Answer: D

Rationale

Choice D is the best answer because it most accurately describes the main purpose of the text. The text notes that although some studies have suggested that posture may have an effect on cognition, this phenomenon should not be overstated. In other words, the text begins by urging caution and restraint when discussing the effects of posture on cognition, implying that even though some studies have shown posture to affect cognition, we should not assume that posture always affects cognition or does so in a strong way. The text goes on to discuss O'Brien and Ahmed's study as a "case in point" (that is, as an example of the point made previously). According to the text, O'Brien and Ahmed hypothesized that since standing is more cognitively demanding than sitting, standing subjects in their experiment would respond differently to decision-making tasks than sitting subjects would, which would show an effect of posture on cognition. What the researchers actually found, however, was that the standing and sitting subjects performed the same—posture did not affect cognition. By presenting a circumstance in which posture does not appear to affect cognition, the discussion of O'Brien and Ahmed's study shows why it is important not to overstate the phenomenon. The purpose of the text, therefore, is to discuss O'Brien and Ahmed's study to illustrate why caution is needed when making claims about posture's effects on cognition.

Choice A is incorrect because the text discusses O'Brien and Ahmed's study as an example of why caution is needed when discussing posture's effects on cognition, not as an example of how research findings related to posture and cognition are often

misunderstood. Although the text does warn against misunderstanding the scope of the relationship between posture and cognition that has been reported in some previous studies, O'Brien and Ahmed's study is not one of those studies, and there is no suggestion that anyone has misunderstood O'Brien and Ahmed's findings. Choice B is incorrect because the text makes no mention of the methods used in previous studies of the effects of posture on cognition. Although the text does urge caution when discussing posture's effects on cognition, it does not critique the results of studies that suggested that posture can affect cognition. Instead, the text suggests that such results should not be exaggerated or taken too broadly. Choice C is incorrect because although the text implies that overstating posture's effects on cognition would be a problem, nothing in the text suggests that O'Brien and Ahmed share that view or that they attempted to solve that problem. O'Brien and Ahmed are presented as hypothesizing that posture would affect cognition in their study, not as trying to resolve the problem the text describes.

Question Difficulty: Hard

Question ID 52aa1317

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: 52aa1317

Raymond Antrobus, an accomplished poet and writer of prose, recently released his debut spoken word poetry album, *The First Time I Wore Hearing Aids*, in collaboration with producer Ian Brennan. The album contains both autobiographical and reflective pieces combining Antrobus’s spoken words with Brennan’s fragmented audio elements and pieces of music to convey how people who are deaf may experience sound, both its presence and absence. Some critics suggest that the album questions the function of sound in the world, highlighting that the experience of sound is multifaceted.

Which choice best describes the overall structure of the text?

- A. It introduces a collaborative spoken word poetry project, details the approach taken to produce the work, and then provides an example of critique the album received upon release.
- B. It mentions a collection of spoken word poems, distinguishes one poem as being an exemplar on the album, and then offers a summary of the subject matter of the whole collection.
- C. It summarizes the efforts to produce a collection of spoken word poems, presents biographies of two people who worked on the album, and speculates about the meaning behind the poetry.
- D. It connects two artists to the same spoken word poetry project, explains the extent of their collaboration on each poem, and then provides an overview of the technique used to produce the work.

ID: 52aa1317 Answer

Correct Answer: A

Rationale

Choice A is the best answer. The text first introduces the album as being a collaboration between Antrobus and Brennan, then describes the approach taken to produce it, then mentions how critics have said that it calls into question the function of sound.

Choice B is incorrect. While the text does mention a collection of spoken word poems, it doesn’t single out one poem as being particularly noteworthy. Additionally, the text doesn’t simply summarize the subject matter—it goes into detail about the content and production of the album. Choice C is incorrect. The text doesn’t provide biographical information about the two artists, and the text doesn’t speculate about the meaning behind the poetry—instead, it relays what some critics have said about the album. Choice D is incorrect. The text doesn’t provide just an overview of the production techniques used but instead goes into more detail about the content and audio elements of the album, as well as critical response to the album.

Question Difficulty: Hard

Question ID d812bcc5

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: d812bcc5

In a study of residential mobility in Washington, DC, LaTanya Brown-Robertson et al. found that increases in household spending power (via tax credits) had mixed effects on mobility decisions, possibly because residential location choices are not fully reducible to economic factors but are also _____ noneconomic factors such as access to strong local social networks.

Which choice completes the text with the most logical and precise word or phrase?

- A. transposed with
- B. mediated by
- C. decoupled from
- D. antecedent to

ID: d812bcc5 Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most logically completes the text’s discussion of residential mobility decisions. In this context, "mediated by" means influenced or affected by something. The text establishes that increasing household spending power (an economic factor) produced "mixed effects" on mobility decisions. The text then explains that residential choices are "not fully reducible to economic factors," which means that these decisions don’t simply rely on how much money is available to spend on a residential move but on other factors as well. According to the text, noneconomic considerations, such as access to social networks, also play a significant role. Thus, "mediated by" accurately captures this relationship where noneconomic factors influence what might otherwise be purely economic decisions.

Choice A is incorrect because "transposed with" would suggest that economic and noneconomic factors are being switched or interchanged when making residential mobility decisions, which wouldn’t make logical sense in this context. The text indicates that these factors coexist and jointly influence such decisions. Choice C is incorrect. The phrase "decoupled from" means separated or disconnected from, which would suggest that economic factors are completely separate from noneconomic factors. This would contradict the text’s main point that residential mobility decisions involve multiple factors being considered simultaneously rather than in isolation. Choice D is incorrect because "antecedent to," which means something prior or earlier, would indicate that noneconomic factors come before economic ones in time or sequence. The text doesn’t establish this chronological relationship. Instead, the text indicates that economic factors (household spending power) and noneconomic factors (access to social networks) simultaneously influence residential mobility decisions.

Question Difficulty: Hard

Question ID 702a74f4

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: 702a74f4

According to a US tax policy expert, state taxes are _____ other factors when considering an interstate move. Even significant differences in state taxation have almost no effect on most people’s decisions, while differences in employment opportunities, housing availability, and climate are strong influences.

Which choice completes the text with the most logical and precise word or phrase?

- A. consistent with
- B. representative of
- C. overshadowed by
- D. irrelevant to

ID: 702a74f4 Answer

Correct Answer: C

Rationale

Choice C is the best answer because it most logically completes the text’s discussion of the factors that influence peoples’ decisions to move to a different state. As used in this context, “overshadowed by” means to be surpassed by or caused to seem less important than other factors affecting a move. The text indicates that, according to a US tax policy expert, when people think about an interstate move, state taxes have little effect on their decisions, while employment opportunities, housing availability, and climate have a very strong effect. This context suggests that people consider these other factors to be more important than state taxes.

Choice A is incorrect because the text indicates that state taxes aren’t as important a consideration as other factors when people are thinking of moving to another state. The context doesn’t suggest that state taxes are “consistent with,” or in agreement with these other factors. Choice B is incorrect because it wouldn’t make sense in context to say that state taxes are “representative of,” or typical of, other factors. Taxes aren’t an example of employment opportunities, housing availability, and climate, which are the other factors listed in the text. Choice D is incorrect because it wouldn’t make sense in context to say that state taxes are “irrelevant to,” or unconnected or unimportant to other factors. State taxes are irrelevant to peoples’ decisions, not to other factors. In other words, although the text suggests that state taxes may be irrelevant to people considering a move to another state, the other factors mentioned in the text, such as employment opportunities, are unable to have an opinion about state taxes. Furthermore, the text indicates that significant differences in state taxes have almost no effect on peoples’ choices to move, but they aren’t completely unimportant.

Question Difficulty: Hard

Question ID 826c2a7e

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: 826c2a7e

Close analysis of the painting *Girl with a Flute*, long attributed to the seventeenth-century Dutch painter Johannes Vermeer, has revealed subtle deviations from the artist’s signature techniques. These variations suggest that the work may be that of a student under Vermeer’s tutelage—potentially _____ our understanding of Vermeer as a solitary artist.

Which choice completes the text with the most logical and precise word or phrase?

- A. negating
- B. prefiguring
- C. entrenching
- D. substantiating

ID: 826c2a7e Answer

Correct Answer: A

Rationale

Choice A is the best answer. "Negating" means "reversing" or "making invalid." Proving that Vermeer worked with students would reverse the view of him as a solitary artist.

Choice B is incorrect. "Prefiguring" means "being an early indicator of." There already existed views of Vermeer as a solitary painter, so a new painting would not be an early indicator of those views. Rather, a painting proving that Vermeer had a student would contradict those earlier views. Choice C is incorrect. "Entrenching" means "solidifying." A painting proving that Vermeer had a student would not solidify views of him as solitary, but would rather contradict those views. Choice D is incorrect. "Substantiating" means "supporting with proof." A painting proving that Vermeer had a student would not support views of him as solitary, but would rather contradict those views.

Question Difficulty: Hard

Question ID f8eacedb

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Cross-Text Connections	

ID: f8eacedb

Text 1

Africa’s Sahara region—once a lush ecosystem—began to dry out about 8,000 years ago. A change in Earth’s orbit that affected climate has been posited as a cause of desertification, but archaeologist David Wright also attributes the shift to Neolithic peoples. He cites their adoption of pastoralism as a factor in the region drying out: the pastoralists’ livestock depleted vegetation, prompting the events that created the Sahara Desert.

Text 2

Research by Chris Brierley et al. challenges the idea that Neolithic peoples contributed to the Sahara’s desertification. Using a climate-vegetation model, the team concluded that the end of the region’s humid period occurred 500 years earlier than previously assumed. The timing suggests that Neolithic peoples didn’t exacerbate aridity in the region but, in fact, may have helped delay environmental changes with practices (e.g., selective grazing) that preserved vegetation.

Based on the texts, how would Chris Brierley (Text 2) most likely respond to the discussion in Text 1?

- A. By pointing out that given the revised timeline for the end of the Sahara’s humid period, the Neolithic peoples’ mode of subsistence likely didn’t cause the region’s desertification
- B. By claiming that pastoralism was only one of many behaviors the Neolithic peoples took part in that may have contributed to the Sahara’s changing climate
- C. By insisting that pastoralism can have both beneficial and deleterious effects on a region’s vegetation and climate
- D. By asserting that more research needs to be conducted into factors that likely contributed to the desertification of the Sahara region

ID: f8eacedb Answer

Correct Answer: A

Rationale

Choice A is the best answer. Brierley et al.’s research directly challenges Wright’s claim that pastoralism turned the Sahara into a desert, suggesting that, in a Sahara that turned arid 500 years earlier than previously thought, pastoral practices may have actually “preserved vegetation” rather than depleting it.

Choice B is incorrect. Brierley et al.’s research actually disputes the idea that any Neolithic peoples’ behaviors, including pastoralism, could have contributed to the Sahara’s changing climate. In fact, their research implies that the Neolithic peoples’ practices did not “exacerbate aridity” (i.e., make things worse), but may have slowed environmental changes. Choice C is incorrect. Brierley et al.’s research does not acknowledge that pastoralism can have deleterious (i.e., negative) effects on a region’s vegetation and climate. It only describes one possible beneficial effect: preserving vegetation through practices like selective grazing. Choice D is incorrect. Brierley et al.’s research does not call for more research into factors that likely contributed to the desertification of the Sahara region.

Question Difficulty: Hard

ID: 0c0e9872

The following text is adapted from Oscar Wilde’s 1895 play *The Importance of Being Earnest*.

CECILY: Have we got to part?

ALGERNON: I am afraid so. It’s a very painful parting.

CECILY: It is always painful to part from people whom one has known for a very brief space of time. The absence of old friends one can endure with equanimity. But even a momentary separation from anyone to whom one has just been introduced is almost unbearable.

As used in the text, what does the word “endure” most nearly mean?

- A. Regret
- B. Persist
- C. Tolerate
- D. Encourage

ID: 0c0e9872 Answer

Correct Answer: C

Rationale

Choice C is the best answer because as used in the text, “endure” most nearly means tolerate. In the text, Cecily and Algernon discuss parting, or saying goodbye. Cecily remarks on the deep pain of saying goodbye to people whom one has only known briefly and then comments on the equanimity, or calm steadiness, one experiences when separated from old friends. The text sets up an ironic contrast: one can easily tolerate, or put up with, the absence of close friends, but even a very short separation from a new acquaintance is unbearable.

Choice A is incorrect. Nothing in the text suggests that Cecily associates regret, or a feeling of sorrow, with the absence of old friends. Rather, the text sets up an ironic contrast between the feeling of calm steadiness one feels when separated from old friends and the unbearable pain of being separated from new acquaintances. Choice B is incorrect. Although in some contexts “endure” can mean persist, or proceed stubbornly, it doesn’t have that meaning in this context because what is being endured is the absence of old friends. Whereas one can persist *despite* the absence of someone else, one can’t persist the absence itself. Choice D is incorrect because the text doesn’t convey that Cecily encourages, or urges, old friends to be absent. Although it may be that Cecily prefers new acquaintances to friends she has known for a long time, the text focuses on her feelings as a result of others’ absences, not on her treatment of others.

Question Difficulty: Hard

Question ID 0714c5f1

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Cross-Text Connections	

ID: 0714c5f1

Text 1

Despite its beautiful prose, *The Guns of August*, Barbara Tuchman’s 1962 analysis of the start of World War I, has certain weaknesses as a work of history. It fails to address events in Eastern Europe just before the outbreak of hostilities, thereby giving the impression that Germany was the war’s principal instigator. Had Tuchman consulted secondary works available to her by scholars such as Luigi Albertini, she would not have neglected the influence of events in Eastern Europe on Germany’s actions.

Text 2

Barbara Tuchman’s *The Guns of August* is an engrossing if dated introduction to World War I. Tuchman’s analysis of primary documents is laudable, but her main thesis that European powers committed themselves to a catastrophic outcome by refusing to deviate from military plans developed prior to the conflict is implausibly reductive.

- Which choice best describes a difference in how the authors of Text 1 and Text 2 view Barbara Tuchman’s *The Guns of August*?
- A. The author of Text 1 argues that Tuchman should have relied more on the work of other historians, while the author of Text 2 implies that Tuchman’s most interesting claims result from her original research.
 - B. The author of Text 1 believes that the scope of Tuchman’s research led her to an incorrect interpretation, while the author of Text 2 believes that Tuchman’s central argument is overly simplistic.
 - C. The author of Text 1 asserts that the writing style of *The Guns of August* makes it worthwhile to read despite any perceived deficiency in Tuchman’s research, while the author of Text 2 focuses exclusively on the weakness of Tuchman’s interpretation of events.
 - D. The author of Text 1 claims that Tuchman would agree that World War I was largely due to events in Eastern Europe, while the author of Text 2 maintains that Tuchman would say that Eastern European leaders were not committed to military plans in the same way that other leaders were.

ID: 0714c5f1 Answer

Correct Answer: B

Rationale

Choice B is the best answer. Both texts are critical of *The Guns of August*, but for different reasons: the author of Text 1 argues that Tuchman missed an important factor leading up to the war because she didn’t consult secondary sources, and the author of Text 2 argues that Tuchman’s main thesis is "reductive," which is a close synonym for "overly simplistic."

Choice A is incorrect. This doesn’t accurately describe the difference. This choice’s summary of Text 1 is accurate, but Text 2 never says that Tuchman’s most interesting claims result from her original research. Choice C is incorrect. This doesn’t accurately describe the difference. Text 1 never says that *The Guns of August* is worthwhile to read despite its research weaknesses. Text 2 does call out a weakness of Tuchman’s interpretation of events, but it also praises her analysis of primary sources. Choice D is incorrect. This doesn’t accurately describe the difference. Text 1 actually says that Tuchman "fails to address" the influence of

events in Eastern Europe, while Text 2 says that Tuchman's thesis was that European powers (not Eastern European leaders) were committed to military plans.

Question Difficulty: Hard

Question ID 218b932d

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Cross-Text Connections	

ID: 218b932d

Text 1

The fossil record suggests that mammoths went extinct around 11 thousand years (kyr) ago. In a 2021 study of environmental DNA (eDNA)—genetic material shed into the environment by organisms—in the Arctic, Yucheng Wang and colleagues found mammoth eDNA in sedimentary layers formed millennia later, around 4 kyr ago. To account for this discrepancy, Joshua H. Miller and Carl Simpson proposed that arctic temperatures could preserve a mammoth carcass on the surface, allowing it to leach DNA into the environment, for several thousand years.

Text 2

Wang and colleagues concede that eDNA contains DNA from both living organisms and carcasses, but for DNA to leach from remains over several millennia requires that the remains be perpetually on the surface. Scavengers and weathering in the Arctic, however, are likely to break down surface remains well before a thousand years have passed.

Which choice best describes how Text 1 and Text 2 relate to each other?

- A. Text 1 discusses two approaches to studying mammoth extinction without advocating for either, whereas Text 2 advocates for one approach over the other.
- B. Text 1 presents findings by Wang and colleagues and gives another research team’s attempt to explain those findings, whereas Text 2 provides additional detail that calls that explanation into question.
- C. Text 1 describes Wang and colleagues’ study and a critique of their methodology, whereas Text 2 offers additional details showing that methodology to be sound.
- D. Text 1 argues that new research has undermined the standard view of when mammoths went extinct, whereas Text 2 suggests a way to reconcile the standard view with that new research.

ID: 218b932d Answer

Correct Answer: B

Rationale

Choice B is the best answer. Text 1 introduces Wang and colleagues’ study and its surprising results, and then mentions Miller and Simpson’s hypothesis as a possible way to explain them. Text 2, however, challenges Miller and Simpson’s hypothesis by pointing out the difficulties of preserving mammoth carcasses on the surface for thousands of years: “scavengers and weathering” are the additional details that complicate the Miller/Simpson hypothesis.

Choice A is incorrect. Neither text compares two different approaches for studying mammoth extinction. Text 1 describes one study and one hypothesis pertaining to it. Text 2 critiques that hypothesis. Choice C is incorrect. Text 1 does not describe a critique of Wang and colleagues’ methodology, but rather an interpretation of their results by Miller and Simpson. Text 2 does not offer additional details showing that methodology to be sound, but rather casts doubt on the Miller/Simpson explanation. Choice D is incorrect. Both components mentioned here (the new “undermining” research and the theory for reconciling this discovery)

are contained in Text 1. Text 2 then shows how the attempt to reconcile the standard view and new research is flawed, and still fails to explain the discrepancy.

Question ID df7bc1cf

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Cross-text Connections	

ID: df7bc1cf

Text 1

What factors influence the abundance of species in a given ecological community? Some theorists have argued that historical diversity is a major driver of how diverse an ecological community eventually becomes: differences in community diversity across otherwise similar habitats, in this view, are strongly affected by the number of species living in those habitats at earlier times.

Text 2

In 2010, a group of researchers including biologist Carla Cáceres created artificial pools in a New York forest. They stocked some pools with a diverse mix of zooplankton species and others with a single zooplankton species and allowed the pool communities to develop naturally thereafter. Over the course of four years, Cáceres and colleagues periodically measured the species diversity of the pools, finding—contrary to their expectations—that by the end of the study there was little to no difference in the pools’ species diversity.

Based on the texts, how would Cáceres and colleagues (Text 2) most likely describe the view of the theorists presented in Text 1?

- A. It is largely correct, but it requires a minor refinement in light of the research team’s results.
- B. It is not compelling as a theory regardless of any experimental data collected by the research team.
- C. It may seem plausible, but it is not supported by the research team’s findings.
- D. It probably holds true only in conditions like those in the research team’s study.

ID: df7bc1cf Answer

Correct Answer: C

Rationale

Choice C is the best answer. This is how Cáceres and co. would most likely describe the view presented in Text 1. The view in Text 1 is that historical diversity affects how diverse an ecological community eventually becomes. But Cáceres and co. did not get this result: they found no difference in eventual diversity between a zooplankton pool that started out diverse and a zooplankton pool that started out with only a single species.

Choice A is incorrect. Cáceres and co. would probably not describe the view presented in Text 1 this way. The view in Text 1 is that historical diversity affects how diverse an ecological community eventually becomes. Cáceres and co’s findings directly undermine this view: they found no difference in eventual diversity between a zooplankton pool that started out diverse and a zooplankton pool that started out with only a single species. Choice B is incorrect. Cáceres and co. would probably not describe the view presented in Text 1 this way. Their experiment was designed to test this hypothesis, and their findings were "contrary to their expectations." In other words, before the study, they predicted the theory was correct. Choice D is incorrect. Cáceres and co. would not describe the view presented in Text 1 this way. Their research finding directly undermines the view presented in Text 1: so it definitely doesn’t hold true in conditions like those in the study.

Question Difficulty: Hard

Question ID bf2915a9

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: bf2915a9

Mathematician Claude Shannon is widely regarded as a foundational figure in information theory. His most important paper, “A Mathematical Theory of Communication,” published in 1948 when he was employed at Bell Labs, utilized a concept called a “binary digit” (shortened to “bit”) to measure the amount of information in any signal and determine the fastest rate at which information could be transmitted while still being reliably decipherable. Robert Gallagher, one of Shannon’s colleagues, said that the bit was “[Shannon’s] discovery, and from it the whole communications revolution has sprung.”

Which choice best describes the overall structure of the text?

- A. It presents a theoretical concept, illustrates how the name of the concept has changed, and shows how the name has entered common usage.
- B. It introduces a respected researcher, describes an aspect of his work, and suggests why the work is historically significant.
- C. It names the company where an important mathematician worked, details the mathematician’s career at the company, and provides an example of the recognition he received there.
- D. It mentions a paper, offers a summary of the paper’s findings, and presents a researcher’s commentary on the paper.

ID: bf2915a9 Answer

Correct Answer: B

Rationale

Choice B is the best answer. The text starts with a general statement that introduces Shannon, then describes a specific contribution from one of his papers, then provides a quote that illustrates just how important this contribution was.

Choice A is incorrect. This isn’t the overall structure. The text only mentions very briefly, in parentheses, that “binary digit” was shortened to “bit.” It doesn’t go into detail about this name change, and it doesn’t discuss any “common usage” of the name at all. Choice C is incorrect. This isn’t the overall structure. Shannon’s employment at Bell Labs is only mentioned once, very briefly: the text never goes into detail about his career there, and it never mentions any recognition he received there. Choice D is incorrect. This is too narrow. Overall, the text is about Shannon’s importance in his field, not just this one paper of his.

ID: 12bece85

Rejecting the premise that the literary magazine *Ebony and Topaz* (1927) should present a unified vision of Black American identity, editor Charles S. Johnson fostered his contributors’ diverse perspectives by promoting their authorial autonomy. Johnson’s self-effacement diverged from the editorial stances of W.E.B. Du Bois and Alain Locke, whose decisions for their publications were more _____.

Which choice completes the text with the most logical and precise word or phrase?

- A. proficient
- B. dogmatic
- C. ambiguous
- D. unpretentious

ID: 12bece85 Answer

Correct Answer: B

Rationale

Choice B is the best answer. A person who is "dogmatic" believes strongly that their principles and opinions are true. Because Du Bois and Locke are implied to have one "unified vision" of Black American identity that they prioritize over the "diverse perspectives" of different writers, they can be described as dogmatic.

Choice A is incorrect. "Proficient" means "skilled." Du Bois and Locke are contrasted with Johnson, but nothing in the text suggests that Johnson was not skilled at making editorial decisions. Based on the text, the three editors just have different styles; they’re not necessarily more or less skilled. Choice C is incorrect. "Ambiguous" means "unclear" or "open to multiple interpretations." However, it’s actually Johnson who encouraged multiple interpretations ("diverse perspectives"). Since Du Bois and Locke are said to "diverge" from Johnson, we can assume that the views they published were not ambiguous, but instead clear and firm (a "unified vision"). Choice D is incorrect. "Unpretentious" means "not trying to impress others with greater skill or importance than is actually possessed." Du Bois and Locke are contrasted with Johnson, but nothing in the text suggests that Johnson is pretentious (trying to impress others).

Question Difficulty: Hard

Question ID c3ef9de3

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Cross-Text Connections	

ID: c3ef9de3

Text 1

In 1916, H. Dugdale Sykes disputed claims that *The Two Noble Kinsmen* was coauthored by William Shakespeare and John Fletcher. Sykes felt Fletcher’s contributions to the play were obvious—Fletcher had a distinct style in his other plays, so much so that lines with that style were considered sufficient evidence of Fletcher’s authorship. But for the lines not deemed to be by Fletcher, Sykes felt that their depiction of women indicated that their author was not Shakespeare but Philip Massinger.

Text 2

Scholars have accepted *The Two Noble Kinsmen* as coauthored by Shakespeare since the 1970s: it appears in all major one-volume editions of Shakespeare’s complete works. Though scholars disagree about who wrote what exactly, it is generally held that on the basis of style, Shakespeare wrote all of the first act and most of the last, while John Fletcher authored most of the three middle acts.

Based on the texts, both Sykes in Text 1 and the scholars in Text 2 would most likely agree with which statement?

- A. John Fletcher’s writing has a unique, readily identifiable style.
- B. The women characters in John Fletcher’s plays are similar to the women characters in Philip Massinger’s plays.
- C. *The Two Noble Kinsmen* belongs in one-volume compilations of Shakespeare’s complete plays.
- D. Philip Massinger’s style in the first and last acts of *The Two Noble Kinsmen* is an homage to Shakespeare’s style.

ID: c3ef9de3 Answer

Correct Answer: A

Rationale

Choice A is the best answer. Text 1 states that Sykes felt Fletcher’s contributions to the play were obvious because he had a distinct style in his other plays. Text 2 states that scholars generally agree “on the basis of style” that Fletcher wrote most of the three middle acts. Both texts imply that Fletcher’s writing has a unique, readily identifiable style that can be used to distinguish his work from others.

Choice B is incorrect. While Text 1 refers to the women in Massinger plays, neither text compares the women of Fletcher’s plays to the women of Massinger’s plays. Text 2 doesn’t mention Massinger at all. Choice C is incorrect. Text 1 states that Sykes disputed that Shakespeare coauthored the play, and implied that it was coauthored by Fletcher and Massinger instead. Sykes, therefore, would disagree that *The Two Noble Kinsmen* belongs in a Shakespeare compilation. Choice D is incorrect. Text 1 doesn’t suggest that Massinger was inspired by Shakespeare, and Text 2 doesn’t mention Massinger at all.

Question ID f7455dfd

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Words in Context	

ID: f7455dfd

Some foraging models predict that the distance bees travel when foraging will decline as floral density increases, but biologists Shalene Jha and Claire Kremen showed that bees’ behavior is inconsistent with this prediction if flowers in dense patches are _____. bees will forage beyond patches of low species richness to acquire multiple resource types.

Which choice completes the text with the most logical and precise word or phrase?

- A. depleted
- B. homogeneous
- C. immature
- D. dispersed

ID: f7455dfd Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most logically completes the text’s discussion of Jha and Kremen’s finding about bees’ foraging behavior. In this context, “homogeneous” means uniform or of the same kind. The text indicates that some models predict that the distance that bees travel when they’re foraging declines as the density of flowers increases. The text goes on to say, however, that Jha and Kremen identified a circumstance in which bees don’t behave this way. Specifically, if bees encounter “patches of low species richness”—that is, patches in which the flowers are largely from the same species—they’ll travel beyond those patches to get varied food resources. This context thus suggests that bees don’t behave as some models predict if the dense patches of flowers the bees encounter are homogeneous.

Choice A is incorrect because the text indicates that Jha and Kremen found that bees will behave differently than some models predict if the bees encounter flower patches that are not rich in species, not if the flowers are “depleted,” or emptied or reduced in quality or quantity. Although it could be true that bees are likely to leave depleted patches in search of more resources, the text doesn’t indicate that Jha and Kremen investigated that possibility. Choice C is incorrect because there’s no information in the text suggesting that bees will not behave as some models predict if flowers in patches are “immature,” or not fully developed. Instead, the text indicates that Jha and Kremen found that bees will behave contrary to some models’ predictions if the flower patches are not rich in species. Choice D is incorrect because the text indicates that bees’ behavior will be inconsistent with the predictions of some models if the flower patches that the bees encounter are of low species richness, not if the flowers are in patches that are “dispersed,” or widely scattered. Although the text does describe bees as leaving patches that are not rich in species to forage elsewhere, there’s no suggestion that Jha and Kremen found that the distance between dense flower patches affects whether the bees behave as some models predict.

Question Difficulty: Hard

Question ID c6ec16fb

Assessment	Test	Domain	Skill	Difficulty
SAT	Reading and Writing	Craft and Structure	Text Structure and Purpose	

ID: c6ec16fb

The following text is from John Dryden’s 1697 translation of Virgil’s poem the *Aeneid*, written in the first century BCE. Queen Dido has just heard the Trojan hero Aeneas recount a sad tale.

But anxious cares already seiz’d the queen:
She fed within her veins a flame unseen;
The hero’s valor, acts, and birth inspire
Her soul with love, and fan the secret fire.
His words, his looks, imprinted in her heart,
Improve the passion, and increase the smart.

- Which choice best states the main purpose of the text?
- A. To indicate that Dido is hiding her skepticism of Aeneas’s account
 - B. To emphasize that Dido has been deeply affected by Aeneas’s story
 - C. To imply that Dido engages both emotionally and intellectually with Aeneas
 - D. To suggest that Dido is worried that Aeneas might discover a secret she is keeping from him

ID: c6ec16fb Answer

Correct Answer: B

Rationale

Choice B is the best answer because it most accurately describes the main purpose of the text, which is to foreground Queen Dido’s strong emotional response to Aeneas’s story. Throughout, the text emphasizes how deeply the queen is affected by both Aeneas’s tale and persona. At the outset, the speaker explicitly states that "anxious cares...seiz’d the queen" and then uses the metaphor of fire ("within her veins a flame unseen" and "secret fire") to evoke the warmth of Dido’s feelings for Aeneas. In addition, the line "His words, his looks, imprinted in her heart" suggests the deep impression that Aeneas’s story makes on Dido, eliciting passion for him ("improv[ing] the passion") and empathy for his suffering ("increas[ing] the smart").

Choice A is incorrect because there’s no indication in the text that Dido is skeptical of Aeneas’s account, much less that she’s trying to conceal that skepticism. On the contrary, the text shows her being moved by his words and developing feelings for him. Choice C is incorrect. While the text mentions that Dido is impressed by Aeneas’s "valor, acts, and birth," which might suggest (but doesn’t necessarily entail) intellectual engagement, the text doesn’t represent Dido’s engagement with Aeneas in a manner that suggests a balance between emotion and intellect. Rather, the text primarily emphasizes her emotional response—specifically her attraction to Aeneas and her emotional investment in his story, indicating that his "valor, acts, and birth inspire / Her soul with love, and fan the secret fire" and that his words and looks elicit passion and empathy. Choice D is incorrect because the text doesn’t suggest that Dido is worried about Aeneas discovering a secret she is concealing from him. Though the text begins by mentioning Dido’s "anxious cares," this refers to her growing passion for Aeneas and pity for his suffering, not to worry about a secret she is concealing. The text’s reference to a "flame unseen" and "secret fire" points to Dido’s growing feelings for Aeneas

that develop as he recounts his tale, not to a secret that existed before their encounter; moreover, the text provides no indication that Dido is worried Aeneas might discover these feelings.

Question Difficulty: Hard
